SETUP

Unpacking

Carefully remove the printer and all components from the packaging. Retain packaging for future transport or storage.

Connecting the Printer

Connect the power cord to the printer and a grounded electrical outlet. For network printing, connect an Ethernet cable to the printer's network port and your network router or switch. For direct connection, use a USB cable to connect the printer to your computer.

Installing Toner and Imaging Unit

Open the front access door of the printer. Insert the imaging unit into its designated slot until it clicks into place. Then, insert the toner cartridge into the imaging unit. Close the front access door.

Loading Paper

Open the paper tray. Adjust the paper guides to fit the size of your paper. Load paper into the tray, ensuring it is flat and within the maximum fill line. Close the paper tray. The printer supports various media types including plain paper, envelopes, transparencies, card stock, and labels.

Driver Installation

Insert the installation CD (if provided) into your computer's optical drive, or download the latest drivers from the Lexmark support website. Follow the on-screen instructions to install the printer drivers and software. For network setup, ensure your computer is connected to the same network as the printer.

OPERATING THE PRINTER

Basic Printing

From your computer, open the document or image you wish to print. Select 'Print' from the application's menu. Choose the Lexmark MS317dn from the list of available printers. Adjust print settings as needed (e.g., number of copies, paper size, print quality) and click 'Print'.

Duplex Printing

Network Printing

Once connected to a network, the printer can be shared among multiple users. Ensure proper network configuration and driver installation on all client computers. The printer is designed to handle a monthly page volume of up to 2,500 pages, making it suitable for shared office environments.

Control Panel Overview

The printer features an LCD display and control buttons for direct interaction. Use the navigation buttons to scroll through menus and select options. The control panel allows for basic configuration, status checks, and error indications.

MAINTENANCE

Replacing Toner Cartridge

When the toner low message appears, order a replacement toner cartridge (e.g., p/n 51B1000, 2,500 page yield). To replace, open the front access door, remove the old toner cartridge, and insert the new one until it clicks into place. Close the door.

Replacing Imaging Unit

The imaging unit has a separate lifespan from the toner cartridge. When prompted by the printer, replace the imaging unit by opening the front access door, removing the old unit, and installing the new one. Refer to the printer's display for specific instructions.

Cleaning the Printer

Periodically clean the exterior of the printer with a soft, damp, lint-free cloth. Do not use abrasive cleaners or solvents. For internal cleaning, refer to the detailed instructions in the official user guide to avoid damaging components.

TROUBLESHOOTING
