Key features include a built-in multi-processor controller with Adobe PostScript 3 support, a standard paper capacity of 3,100 sheets (expandable to 13,500 sheets with optional trays), and support for media sizes from A5 to A3+ (including 13" x 19"). The printer is equipped with a 5 GB standard memory and a 1 TB hard disk.

2. SETUP

2.1 Unpacking and Placement

The Sharp MX-7500N is a substantial piece of equipment, weighing approximately 490 pounds (222 kg) and measuring 33.3 x 33.3 x 48 inches (84.6 x 84.6 x 121.9 cm). Due to its weight and size, professional assistance is recommended for unpacking and placement. Ensure the printer is placed on a sturdy, level surface in a well-ventilated area, with adequate space around it for operation and maintenance access.

2.2 Power Connection

Connect the provided power cord to the printer's power inlet and then to a grounded electrical outlet. Ensure the power supply meets the printer's requirements. Do not use extension cords or power strips that are not rated for the printer's power consumption.

2.3 Network Connection

The MX-7500N connects to a network via Ethernet. Locate the Ethernet port on the rear of the printer and connect it to your network using a standard Ethernet cable. Configure network settings (IP address, subnet mask, gateway) through the printer's control panel or a web interface, as guided by your network administrator.

2.4 Paper Loading

The printer comes standard with two paper trays and a tandem tray, providing a total input capacity of 3,100 sheets. Additional optional trays can expand capacity to 13,500 sheets. Supported paper sizes include 5½" x 8½", 8½" x 11", 8½" x 11" R, 8½" x 14", 11" x 17", 12" x 18", and 13" x 19".

1. Open the desired paper tray.
2. Adjust the paper guides to match the size of the paper being loaded.
3. Load the paper stack, ensuring it does not exceed the maximum fill line.
4. Close the paper tray securely.
5. Confirm the paper type and size on the control panel if prompted.
