4. TROUBLESHOOTING

If you encounter any issues with your OttLite lamp, refer to the following common troubleshooting steps:

- **Lamp Does Not Turn On:**
 - Ensure the power cord is securely plugged into a working electrical outlet.
 - Check the power switch on the lamp head to ensure it is in the 'On' position.
 - Verify that the bulb is correctly seated in its socket. If the bulb is old, it may need replacement.
- **Light is Flickering:**

- While OttLite lamps are designed for steady illumination, flickering can sometimes occur if the bulb is not fully seated or is nearing the end of its lifespan. Re-seat the bulb or replace it if necessary.
- **Lamp is Unstable:**
 - Ensure the main pole is securely attached to the heavy base.
 - Place the lamp on a flat, stable surface.

If these steps do not resolve the issue, please contact OttLite customer support for further assistance.
