## UPBRIGHT Doxie Go DX200 Power Supply

# UPBRIGHT 6V AC/DC Adapter User Manual

Model: Doxie Go DX200 Power Supply

## 1. Introduction

This manual provides essential instructions for the safe and effective use of your UPBRIGHT 6V AC/DC Adapter. This power supply is designed to provide reliable power to compatible Doxie Go portable document scanners, including models DX200, DX220, DX250, and Doxie One WiFi. Please read this manual thoroughly before using the product and retain it for future reference.

## 2. Product Overview

The UPBRIGHT 6V AC/DC Adapter is a compact and efficient power solution for your Doxie Go scanner. It converts standard AC wall power to the required 6V DC output, enabling both operation and charging of your device.

Image 1: The UPBRIGHT 6V AC/DC Adapter, displaying its model and electrical specifications on the label.

## 3. Safety Information

- Use only with compatible devices as specified in this manual.
- Do not expose the adapter to water, moisture, or extreme temperatures.
- Avoid dropping or subjecting the adapter to severe impact.
- Do not attempt to open or modify the adapter. This may void the warranty and pose a safety risk.

- Ensure the power outlet is easily accessible and unplug the adapter during electrical storms or when unused for extended periods.
- Keep out of reach of children.

## 4. Setup Instructions

1. **Unpack the Adapter:** Carefully remove the UPBRIGHT 6V AC/DC Adapter from its packaging.
2. **Connect to Scanner:** Insert the DC output plug of the adapter into the power input port of your Doxie Go portable document scanner. Ensure a firm connection.
3. **Connect to Power Outlet:** Plug the AC input prongs of the adapter into a standard wall power outlet. For international use, if an appropriate adapter plug was included, attach it to the AC input prongs before plugging into the wall outlet.

Image 2: The UPBRIGHT 6V AC/DC Adapter, illustrating its compatibility with various international power outlets via interchangeable plug adapters (AU, EU, UK types shown).

## 5. Operating Instructions

Once properly connected, the UPBRIGHT 6V AC/DC Adapter will begin supplying power to your Doxie Go scanner. If your scanner has a charging indicator light, it should illuminate to confirm that the device is receiving power and charging its internal battery (if applicable). You can now operate your scanner while it is connected to the power supply, or allow it to charge fully before disconnecting for portable use.

## 6. Maintenance

- **Cleaning:** Disconnect the adapter from the power outlet and the scanner before cleaning. Use a soft, dry cloth to wipe the surface. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use, store the adapter in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid tightly coiling the cable to prevent damage.
- **Cable Care:** Regularly inspect the power cord for any signs of damage, such as fraying or exposed wires. If damage is found, discontinue use immediately and replace the adapter.

## 7. Troubleshooting

- **No Power to Scanner:**
  - Ensure the adapter is securely plugged into both the wall outlet and the scanner.
  - Verify the wall outlet is functional by testing it with another device.
  - Check the adapter cable for any visible damage.
- **Slow Charging:**
  - Ensure the scanner's battery is not excessively drained.
  - Confirm the adapter is the correct model for your scanner.
- **Adapter Feels Warm:**

  It is normal for power adapters to become warm during operation. If the adapter becomes excessively hot to the touch or emits a burning smell, unplug it immediately and discontinue use.

## 8. Specifications

| | |
|---|---|
| **Brand** | UPBRIGHT |
| **Model Number** | Doxie Go DX200 Power Supply |
| **Input Voltage** | 100-240V AC (Global Compatibility) |
| **Output Voltage** | 6V DC |
| **Wattage** | 10 Watts |
| **Connector Type** | Proprietary |
| **Included Components** | 1 adapter |
