Key Components:

- **Ratchet and Sockets:** Includes 1/4 inch and 3/8 inch socket sets, ensuring accurate sizing. The 72-tooth ratchet allows for easy direction changes.
- **Wrenches:** A comprehensive assortment of professional-grade wrenches.
- **Screwdrivers and Bits:** Variety of 1/4-inch screwdriver bits including Phillips, slotted, square, star, and pozi.
- **Hammer:** An 11-inch rip claw hammer for various striking and prying tasks.
- **Pliers:** 6.5-inch long nose pliers for gripping and bending.
- **Adjustable Wrench:** A 7-inch adjustable wrench for versatile use.
- **Measuring Tape:** A 10-foot measure tape rule for accurate measurements.
- **Storage Case:** A durable, blow-molded case with a sturdy interior and organizer to keep tools in place.

Setup

Upon receiving your DEKOPRO 128 Piece Tool Set, please follow these steps:

1. **Unpack:** Carefully remove the tool set from its packaging.
2. **Inspect:** Open the case and visually inspect all tools for any signs of damage or missing components. Refer to the product overview section for a list of included items.
3. **Familiarize:** Take a moment to familiarize yourself with the placement and function of each tool within the organized case.
4. **Storage:** Ensure all tools are securely placed in their designated slots within the case to prevent movement and damage during transport or storage.

Operating Instructions

This tool set is designed for a wide range of household and auto repair tasks. Always select the correct tool for the job and ensure it is used safely.

General Usage Tips:

- **Ratchets and Sockets:**

- Select the correct socket size for the fastener.
- Attach the socket firmly to the ratchet.
- Use the directional switch on the ratchet head to select tightening or loosening.
- Apply steady pressure to turn the fastener.

- **Screwdrivers:**

- Choose the appropriate bit (Phillips, slotted, square, star, pozi) for the screw head.
- Insert the bit securely into the magnetic screwdriver handle.
- Apply downward pressure while turning to prevent stripping the screw head.

- **Wrenches:**

- Select the correct size wrench for the nut or bolt.
- Ensure the wrench jaws fully engage the fastener to prevent slipping.
- For adjustable wrenches, tighten the jaw firmly around the fastener before applying torque.

- **Hammer:**

- Always wear safety glasses when using a hammer.
- Grip the hammer firmly near the end of the handle for maximum leverage.
- Strike nails squarely to avoid bending.

- **Pliers:**

- Use pliers for gripping, bending, or cutting as intended.
- Avoid using pliers as a hammer or wrench, as this can damage the tool.

Maintenance

Proper maintenance ensures the longevity and performance of your tool set.

- **Cleaning:** After each use, wipe down tools to remove dirt, grease, and moisture. A clean cloth is usually sufficient.

For stubborn grime, use a mild degreaser.

- **Lubrication:** Periodically apply a light coat of machine oil to moving parts of tools like ratchets and adjustable wrenches to ensure smooth operation and prevent rust.
- **Storage:** Always return tools to their designated slots in the blow-molded case. The sturdy interior and organizer are designed to keep tools in place and protect them from damage and corrosion. Store the case in a dry environment away from extreme temperatures.
- **Inspection:** Regularly inspect tools for signs of wear, damage, or corrosion. Replace any damaged tools to ensure safety and effectiveness.

Troubleshooting

Most issues with a general tool set can be resolved with simple checks.

- **Tools not fitting in slots:** Ensure you are placing each tool in its correct, uniquely molded slot. The case is designed for a snug fit.
- **Tools feeling loose or wobbly:** Check for any debris or obstruction in the tool's mechanism or connection point. Clean thoroughly if necessary.
- **Rust or corrosion:** This indicates exposure to moisture. Ensure tools are clean and dry before storage. Apply a rust-inhibiting oil if needed.
- **Damaged tool:** If a tool is bent, cracked, or otherwise compromised, discontinue use immediately and replace it. Do not attempt to repair severely damaged tools as this can be unsafe.
