# DaVinci M11999 Toddler Bed Conversion Kit Instruction Manual

Model: M11999 | Brand: DaVinci

## INTRODUCTION

This instruction manual provides detailed guidance for the safe and proper assembly, use, and maintenance of your DaVinci M11999 Toddler Bed Conversion Kit. This kit is designed to convert your compatible full-size crib into a toddler bed, extending the usability of your nursery furniture.

## SAFETY INFORMATION

Please read all instructions carefully before assembly and use. Failure to follow these instructions could result in serious injury. Keep this manual for future reference.

- Always ensure all parts are securely fastened before allowing a child to use the toddler bed.
- Regularly check all screws and bolts to ensure they are tight.
- Do not use this conversion kit if any parts are missing, damaged, or broken. Contact the manufacturer for replacement parts.
- The toddler bed is intended for children who can get in and out of bed unassisted.
- Maximum weight recommendation for the toddler bed is 50 pounds.
- Do not place the toddler bed near windows where cords from blinds or drapes could strangle a child.
- Do not place items with a string, cord, or ribbon around a child's neck, such as hood strings or pacifier cords.
- Do not suspend strings over a toddler bed or attach strings to toys.

## PARTS LIST

Verify that all components are present before beginning assembly. If any parts are missing or damaged, do not proceed with assembly and contact customer service.

- Toddler Bed Rail (M11999G) - 1 unit
- Assembly Hardware (screws, bolts, etc.) - 1 set (refer to specific hardware bag for details)

## SETUP AND INSTALLATION

---

This kit is designed for easy conversion of your compatible DaVinci full-size crib. Ensure you have the original crib assembly instructions for reference, as some steps may involve disassembling parts of the crib.

1. **Prepare the Crib:** Carefully remove the front rail of your full-size crib according to its original assembly instructions. Retain all hardware, as some may be reused.
2. **Position the Toddler Rail:** Align the DaVinci M11999 Toddler Bed Conversion Kit rail with the designated attachment points on the crib's headboard and footboard. The rail replaces the removed front crib rail.
3. **Secure the Rail:** Using the provided hardware (or original crib hardware if specified in the kit's instructions), securely attach the toddler rail to the crib's headboard and footboard. Ensure all bolts are tightened firmly. Do not overtighten.
4. **Verify Stability:** Once assembled, gently shake the toddler bed to ensure it is stable and all connections are secure.

## MAINTENANCE

Proper maintenance will ensure the longevity and safety of your toddler bed.

- **Cleaning:** Wipe with a damp cloth. Avoid abrasive cleaners or strong chemicals that could damage the finish.
- **Inspections:** Periodically inspect all hardware for tightness. Tighten any loose screws or bolts.
- **Damage:** If any part of the bed becomes damaged, discontinue use immediately and contact the manufacturer for replacement parts.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Rail does not fit or align with crib.	Incorrect model conversion kit purchased; crib is not compatible.	Verify your crib's model number and ensure it is compatible with the DaVinci M11999 conversion kit. Contact the retailer or manufacturer if unsure.
Screws do not fit or are too short/long.	Using incorrect hardware; original crib screws may be required.	Refer to the kit's specific hardware instructions. Some kits require reusing the original crib screws. Ensure you are using the correct screws for each connection point.
Toddler bed feels unstable after assembly.	Hardware not fully tightened; parts incorrectly assembled.	Re-check all connections and tighten all screws and bolts firmly. Ensure all parts are oriented correctly as per instructions.

## SPECIFICATIONS

**Model Number:** M11999G

**Brand:** DaVinci

**Material Type:** Wood

**Color:** Grey

**Product Dimensions:** 1"W x 13.5"H (Note: This refers to the rail's cross-section, not overall length)
