Nickelodeon Slime Super Slimey DIY Kit Instruction Manual

Model: 18829

IMPORTANT SAFETY INFORMATION

Warning: This set contains chemicals that may be harmful if misused. Read cautions on individual containers carefully. Not to be used by children except under adult supervision.

Recommended for ages 6+.

WHAT'S INCLUDED

Your Nickelodeon Slime Super Slimey DIY Kit includes the following components:

- 1 x 4oz Clear Glue
- 1 x 4oz White Glue
- 2 x 2oz bottles Slime Activator
- 3 x 5ml pots Colorant
- 2 x 5ml pots Scented Colorant
- 1 x 5ml pot Glow Colorant
- 2 x 2g bags Glitter
- 1 x 2g bag Foam Beads
- 4 x Cups with Lids
- 1 x Measuring Cup
- 2 x Mixing Bowls
- 6 x Slime Sticks
- 1 x Spoon
- 1 x Instruction Sheet

This image displays all the components included in the kit, neatly arranged on a white surface. You can see bottles of clear and white glue, slime activator, small pots of various colorants, bags of glitter and foam beads, mixing bowls, measuring cup, slime sticks, a spoon, and storage cups with lids.

SETUP

Preparing Your Workspace

Before beginning, ensure you have a clean, flat surface. Cover the surface with newspaper or a protective mat to prevent spills and stains. Gather all kit components and ensure they are within easy reach. Adult supervision is required.

OPERATING INSTRUCTIONS: MAKING SLIME

Basic Slime Creation

1. **Measure Glue:** Pour 4oz of either clear or white glue into one of the mixing bowls.
2. **Add Color/Scent (Optional):** If desired, add a few drops of colorant or scented colorant to the glue. Mix thoroughly with a slime stick until the color is evenly distributed.
3. **Add Activator:** Slowly add 1 oz (half of one 2oz bottle) of slime activator to the glue mixture. Stir continuously.

4. **Mix Thoroughly:** Continue stirring for 2-3 minutes. The mixture will begin to thicken and pull away from the sides of the bowl.
5. **Knead Slime:** Once the slime forms a cohesive ball, remove it from the bowl and knead it with your hands for 5-10 minutes. This process helps achieve the desired slime consistency. If the slime is too sticky, add a few more drops of activator and knead again. If it's too stiff, add a tiny amount of glue and knead.

This image shows two children actively engaged in making slime. They are seated at a table, each with a mixing bowl and various ingredients like glue and colorants. The boy is pouring liquid from a bottle into his bowl, while the girl is stirring her mixture. This illustrates the hands-on process of slime creation.

Customizing Your Slime

Adding Glitter and Foam Beads

Once your basic slime is made, you can incorporate glitter or foam beads for added texture and visual appeal.

- **Glitter:** Flatten your slime into a disc. Sprinkle glitter onto the surface. Fold the slime over and knead until the glitter is evenly distributed.
- **Foam Beads:** Flatten your slime. Place foam beads in the center. Fold the slime and gently knead to embed the beads. Be careful not to over-knead, as this can crush the beads.

Glow-in-the-Dark Slime

To create glow-in-the-dark slime, add the glow colorant during step 2 of the basic slime creation process. Ensure it is thoroughly mixed. For best glow results, expose the finished slime to a bright light source for several minutes, then observe in a dark room.

MAINTENANCE AND STORAGE

Care Instructions

To prolong the life of your slime, always store it in an airtight container when not in use. The provided cups with lids are ideal for this purpose.

Cleaning Up

- **Hands:** Wash hands thoroughly with soap and water after playing with slime.
- **Surfaces:** Clean any slime residue from surfaces immediately with warm water and soap. For stubborn stains, a damp cloth with a small amount of rubbing alcohol may be used, but test on an inconspicuous area first.
- **Clothing:** For slime on clothing, allow it to dry completely, then scrape off as much as possible. Treat any remaining residue with a stain remover before washing.

TROUBLESHOOTING

Slime is Too Sticky

If your slime is excessively sticky, add a very small amount of slime activator (a few drops at a time) and knead thoroughly. Repeat until the desired consistency is achieved.

Slime is Too Stiff/Hard

If your slime is too stiff or breaks easily, add a tiny amount of clear or white glue (a few drops at a time) and knead thoroughly. This can help restore elasticity.

Slime Lost its Stretch

Over time, slime can lose its elasticity. Storing it properly in an airtight container helps. If it becomes less stretchy, try kneading it for a longer period or adding a tiny bit of glue.

SPECIFICATIONS

Product Details

Property	Value
Brand	Nickelodeon
Model Name	Nickelodeon Slime Super Slimey DIY Kit
Model Number	18829
Item Weight	16 ounces
Item Dimensions	12 x 2 x 12 inches
Material Type	Foam, Paper, Plastic
Age Range	6+ years (72 months to 168 months manufacturer recommended)
UPC	755541120204, 884920188297
