MAINTENANCE

To ensure the longevity and proper functioning of your Maclean MC-751 monitor mount, follow these simple maintenance guidelines:

TROUBLESHOOTING

If you encounter any issues with your Maclean MC-751 monitor mount, refer to the following common problems and solutions:

Monitor sags or tilts unexpectedly.	Tilt mechanism not tightened sufficiently, or monitor weight exceeds capacity.	Ensure the tilt knob is fully tightened. Verify your monitor's weight does not exceed 8 kg.
Mount feels unstable on the desk.	Desk clamp not securely fastened.	Re-tighten the desk clamp screw until the mount is firm. Ensure the desk surface is suitable.
