

INFAC SD14

Infac Safe SD14 Gun Safe User Manual

Model: SD14

1. INTRODUCTION

The Infac Safe SD14 gun safe is a high-quality security solution manufactured in Europe, designed for the secure storage of firearms and valuables. This manual provides essential information for the safe and effective installation, operation, and maintenance of your SD14 gun safe. Please read this manual thoroughly before using the product.

The SD14 model is engineered to store up to 11 rifles with scopes, plus an additional 3 firearms in the door, and includes a secured interior compartment along with removable shelves for versatile storage.

2. SAFETY INFORMATION

Your safety and the security of your firearms are paramount. Adhere to the following safety guidelines:

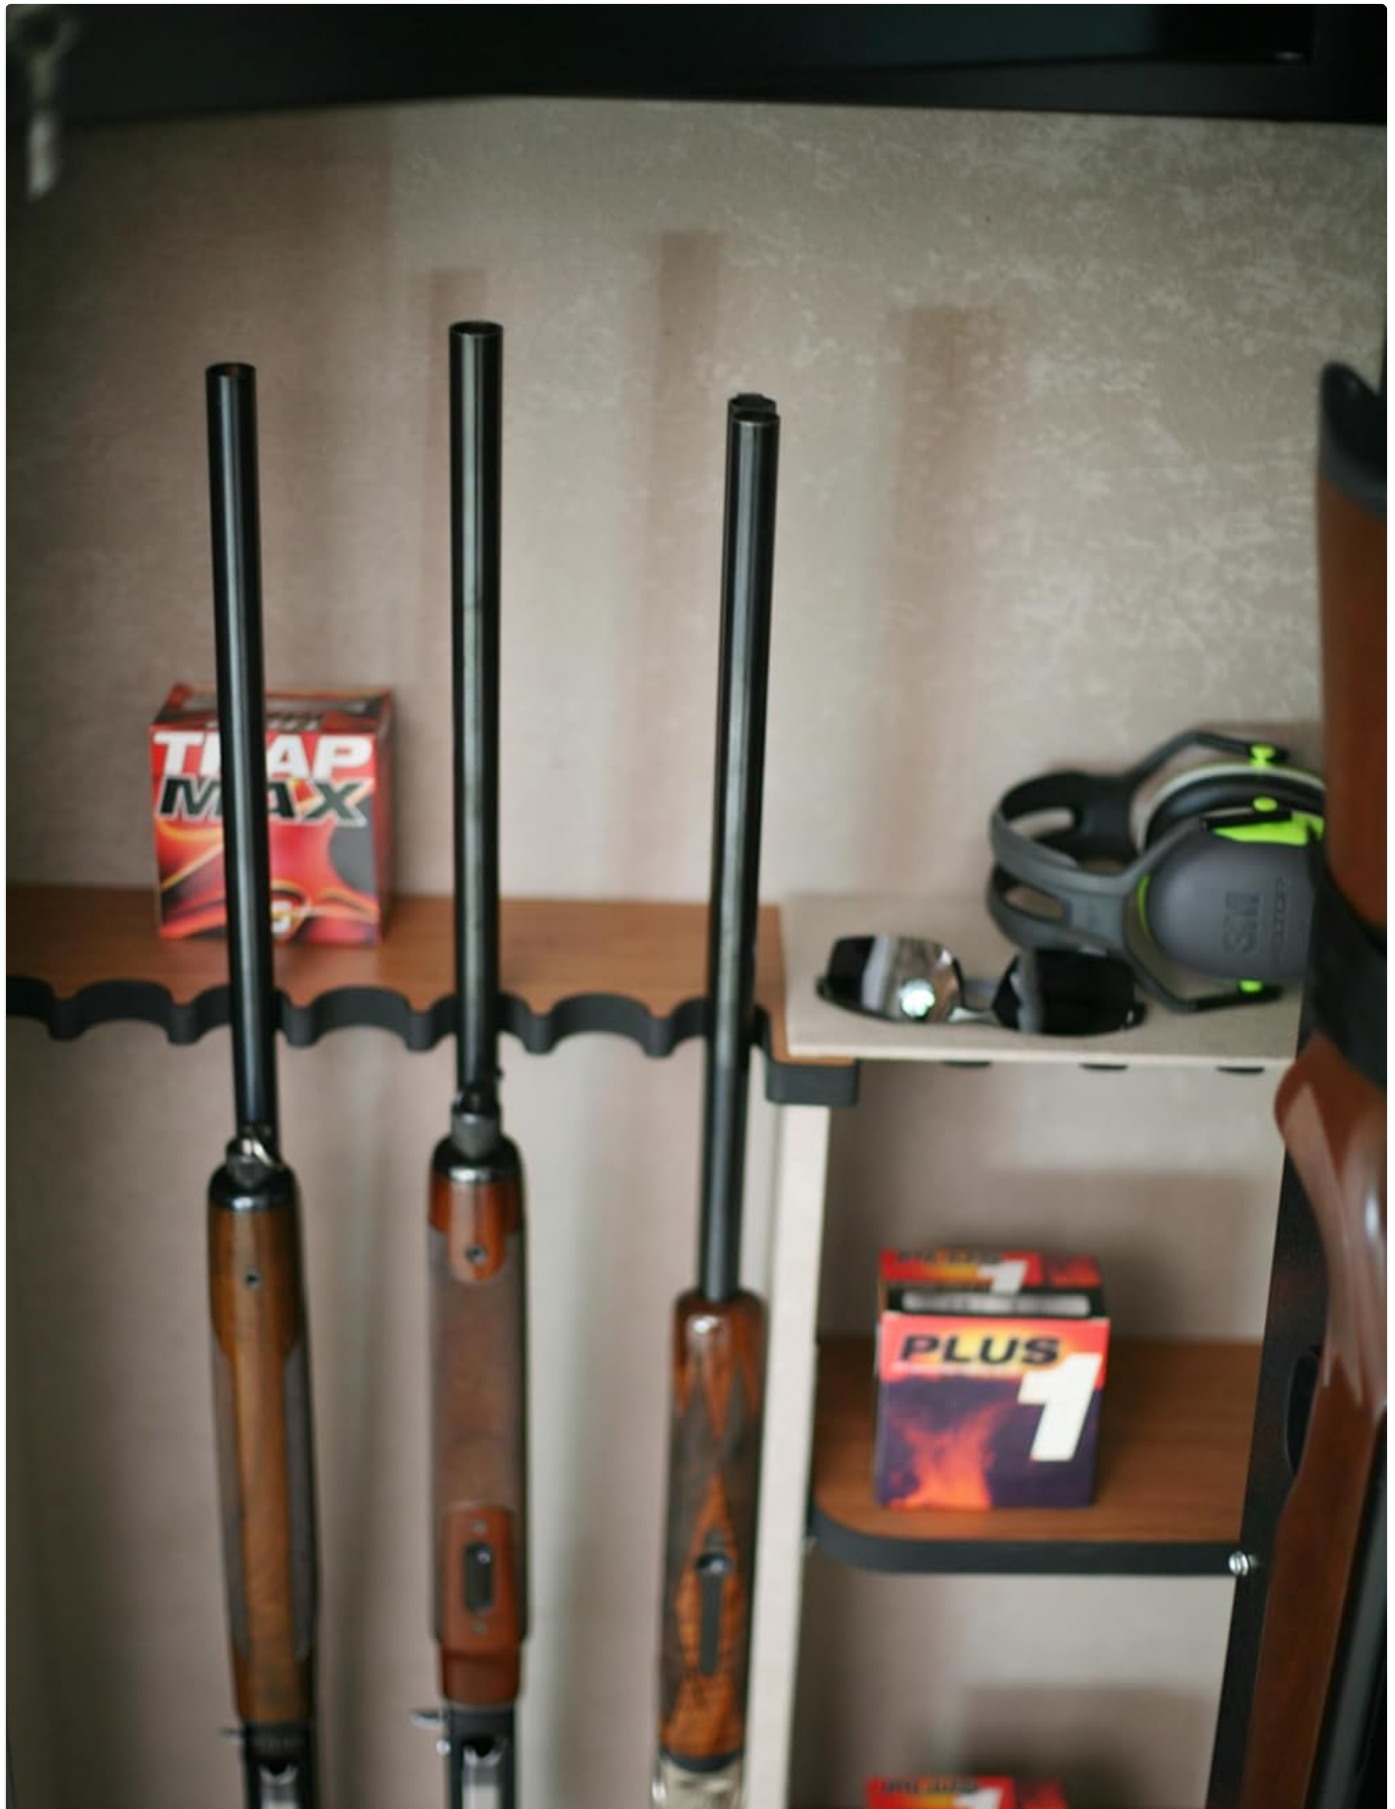

- Always store firearms unloaded and locked within the safe.
- Keep the safe keys in a secure location, inaccessible to unauthorized individuals, especially children.
- Ensure the safe is installed on a level, stable surface capable of supporting its significant weight (90 kg / 198 lbs) and the weight of its contents.
- Properly anchor the safe to the floor and/or wall as instructed in the "Setup and Installation" section to prevent tipping or unauthorized removal.
- Do not store flammable materials, explosives, or other hazardous items inside the safe.
- Regularly inspect the safe for any signs of damage or tampering.
- Seek professional assistance if you encounter difficulties with installation or operation that cannot be resolved using this manual.

3. PRODUCT OVERVIEW AND FEATURES

The Infac Safe SD14 is designed with robust security features and practical storage solutions.

- **Premium Steel Construction:** Body and door crafted from high-quality steel, 2 mm thick, for superior protection.
- **Double-Walled Anti-Pry Door:** Features a double-walled door with an advanced anti-pry system to resist forced entry.
- **Secure Locking Mechanism:** Equipped with 5 deep-engaging, 22 mm diameter steel locking bolts.
- **High-Security Key Lock:** Utilizes a high-security 6-lever key lock system (2 keys provided).
- **Pre-Drilled Mounting Holes:** Includes pre-drilled holes for secure floor and wall mounting.

- **Durable Finish:** Coated with highly resistant black epoxy paint, heated to 220°C for longevity.
- **Wooden Gun Rack:** Interior features a wooden rack for organized firearm storage.
- **Beige Interior Lining:** Provides a protective and aesthetic interior.
- **Secured Interior Compartment:** An additional locked compartment for sensitive items.
- **Removable Shelves:** Two adjustable shelves are included for flexible storage configurations.

This image displays the spacious interior of the SD14 gun safe, designed to accommodate up to 11 rifles with scopes. It features a wooden gun rack for secure vertical storage and adjustable shelves for ammunition or other valuables. A secured interior compartment is visible at the top.

A full front view of the Infac Safe SD14 gun safe when closed. The robust steel construction and durable black epoxy paint finish are visible, highlighting the secure and discreet design of the unit.

4. PACKAGE CONTENTS

Upon unpacking, please verify that all the following components are present:

- 1 x Infac Safe SD14 Gun Safe Unit
- 2 x High-Security Keys
- 2 x Removable Shelves
- 2 x Screws and Concrete Anchors for Floor Mounting
- User Manual (this document)

If any items are missing or damaged, please contact your retailer or Infac Safe customer support immediately.

5. SETUP AND INSTALLATION

Due to the significant weight of the SD14 gun safe (approximately 90 kg / 198 lbs), it is highly recommended to have at least two people for safe handling and installation.

5.1. Choosing a Location

Select a discreet, dry, and secure location for your safe. Ensure the floor is capable of supporting the safe's weight. Consider locations that allow for easy access but are out of sight from casual visitors.

5.2. Unpacking

Carefully remove the safe from its packaging. Inspect the safe for any visible damage that may have occurred during transit. Retain the packaging materials until you are satisfied with the safe's condition and functionality.

5.3. Anchoring the Safe

For maximum security, the SD14 gun safe must be securely anchored to the floor and/or a wall. Pre-drilled holes are provided at the back and bottom of the safe for this purpose.

1. Position the safe in its desired location.
2. Open the safe door and mark the positions of the pre-drilled holes on the floor and/or wall using a pencil.
3. Move the safe away from the marked area.
4. Using an appropriate drill bit for your floor/wall material (e.g., masonry bit for concrete), drill holes at the marked positions to the required depth.
5. Insert the provided concrete anchors into the drilled floor holes. For wall mounting, use appropriate wall anchors (not included, as wall materials vary).
6. Carefully reposition the safe, aligning its holes with the drilled holes/anchors.
7. Secure the safe using the provided screws for floor mounting. For wall mounting, use suitable screws that engage firmly with your chosen wall anchors. Tighten all screws securely.
8. Ensure the safe is stable and cannot be easily moved or tipped.

This illustration provides the external dimensions of the Infac Safe SD14 gun safe, measuring 148.5 cm in height, 70 cm in width, and 33 cm in depth. These measurements are crucial for planning the installation location and ensuring proper fit.

6. OPERATING INSTRUCTIONS

6.1. Opening the Safe

1. Insert one of the provided keys into the keyhole on the safe door.
2. Turn the key clockwise until the locking bolts retract.
3. Pull the door open.

6.2. Closing and Locking the Safe

1. Ensure all contents are properly placed and do not obstruct the door mechanism.
2. Gently push the door closed until it is flush with the safe body.
3. Insert the key into the keyhole and turn it counter-clockwise until the locking bolts fully extend and engage.
4. Remove the key and store it in a secure, hidden location. Always remove the key after locking.

6.3. Using the Interior Compartment and Shelves

- **Secured Interior Compartment:** The small compartment at the top of the safe can be locked separately for additional security. Use its dedicated key (if provided, or the main safe key if it's a shared lock) to open and close it.
- **Removable Shelves:** The two removable shelves can be positioned at various heights within the safe to customize your storage space. Simply lift and reposition them on the desired support brackets.
- **Gun Rack:** Utilize the wooden gun rack to store rifles vertically, ensuring they are stable and do not shift.

7. MAINTENANCE

Regular maintenance will ensure the longevity and reliable operation of your Infac Safe SD14.

- **Cleaning:** Wipe the exterior of the safe with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the paint finish. For the interior, a dry cloth is usually sufficient.
- **Lock Mechanism:** Periodically apply a small amount of graphite powder or a specialized lock lubricant to the keyhole to ensure smooth operation. Do not use oil-based lubricants as they can attract dust and grime.
- **Hinges:** Check the door hinges periodically for smooth movement. If they squeak, a small amount of light machine oil can be applied.
- **Security Check:** Regularly inspect the mounting bolts and the safe's overall stability to ensure it remains securely anchored. Check for any signs of forced entry attempts or damage.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Key does not turn or is stiff.	Dust/debris in lock, worn key, or misaligned mechanism.	Apply graphite powder to the keyhole. Try the spare key. Do not force the key. If problem persists, contact support.
Door does not close properly.	Obstruction, misaligned door, or contents blocking the door.	Check for items obstructing the door frame. Ensure the safe is level. Inspect hinges for damage.
Safe feels unstable after installation.	Mounting bolts not fully tightened or insufficient anchoring.	Re-tighten all mounting bolts. Ensure appropriate anchors were used for your wall/floor material. Consider adding more anchor points if possible.

For issues not listed here or if solutions do not resolve the problem, please contact Infac Safe customer support.

9. SPECIFICATIONS

Feature	Detail
---------	--------

Feature	Detail
Brand	INFAC
Model Number	SD14
Color	Black
Material	Alloy Steel
