Diaper Genie I000256

Diaper Genie Elite Diaper Pail Instruction Manual

Brand: Diaper Genie

Model: I000256

1. INTRODUCTION

The Diaper Genie Elite Diaper Pail is designed to provide an effective and hygienic solution for diaper disposal, minimizing odors in your nursery. It features a double-lock design, multi-layer refill bags, and an integrated carbon filter for enhanced odor control, ensuring a fresh environment.

3. SETUP INSTRUCTIONS

Follow these steps for the initial setup of your Diaper Genie Elite Diaper Pail:

1. **Unpack Components:** Carefully remove all items from the packaging.
2. **Install Refill Bag:** Open the pail lid. Place the Diaper Genie multi-layer refill ring into the designated compartment at the top of the pail. Pull approximately 18 inches of the film down through the pail's opening and tie a knot at the end of the film to create the bottom of the bag.
3. **Insert Carbon Filter:** Locate the carbon filter holder on the underside of the pail's lid. Insert the Diaper Genie Carbon Filter into this holder. Ensure it is securely seated.
4. **Close Lid:** Close the pail lid until it clicks into place.

Carbon filter
absorbs & locks in
strong diaper odours

4. OPERATING INSTRUCTIONS

The Diaper Genie Elite Diaper Pail offers hands-free operation for convenient and hygienic diaper disposal:

1. **Open Pail:** Step firmly on the foot pedal located at the base of the pail. This will open the lid, providing access to the disposal opening.
2. **Insert Diaper:** Place the soiled diaper into the opening.
3. **Seal Odors:** Release the foot pedal. The lid will close, and the Double Air-Tite clamps will engage, sealing the opening and trapping odors inside the multi-layer bag.

A person wearing blue jeans and white sneakers is standing next to a white, foot-operated toilet. The person's right foot is on the foot pedal, and their left hand is holding the open lid of the toilet. The toilet has a blue seat and a white lid. The background is a solid light orange color.

5. MAINTENANCE

5.1 Emptying the Pail

Empty the pail when it is full or as needed to maintain freshness:

1. **Open Front Bin:** Press the button on the front of the pail to tilt open the lower bin.
2. **Cut Bag:** Locate the built-in childproof cutter inside the pail. Pull the filled bag upwards and across the cutter to separate the soiled portion from the remaining refill film.
3. **Dispose:** Tie a knot at the top of the cut, filled bag and remove it for disposal. Tie a new knot at the bottom of the remaining refill film to prepare for continued use.

5.2 Replacing Refill Bags

When the refill bag is completely used, replace it with a new Diaper Genie round refill:

1. **Remove Old Refill:** Open the pail lid and remove the empty refill ring from its compartment.
2. **Insert New Refill:** Place a new Diaper Genie round refill into the compartment. Pull the film down through the pail's opening and tie a knot at the end to form the bottom of the new bag.
3. **Close Lid:** Close the pail lid securely.

The ultimate solution for odour control

5.3 Replacing Carbon Filter

For optimal odor control, replace the carbon filter regularly:

- It is recommended to replace the carbon filter every 3 months, or sooner if you notice persistent odors.
- To replace, open the pail lid, remove the old filter from its holder, and insert a new Diaper Genie Carbon Filter.

Double Air-Tite® clamps help prevent odours from escaping

Image: Internal view of the Double Air-Tite clamps, a key feature for odor prevention.

6. TROUBLESHOOTING

If you encounter any issues with your Diaper Genie Elite Diaper Pail, refer to the following common problems and solutions:

- **Persistent Odors:**

- Ensure the carbon filter is fresh and correctly installed. Replace if it's older than 3 months.
- Verify the refill bag is properly sealed and not overfilled.
- Check for any debris around the Double Air-Tite clamps that might prevent a complete seal.
- Consider emptying the pail more frequently.

- **Foot Pedal Not Working:**

- Inspect the foot pedal mechanism for any obstructions.
- Ensure the pail is on a flat, stable surface.

- **Difficulty Cutting Bag:**

- Ensure the bag is pulled taut across the cutter.
- The cutter is designed for safety; apply firm, even pressure.

7. SPECIFICATIONS
