5.3 Using Multiple Displays

The ThinkCentre M710T supports independent display output for up to two monitors. Connect your monitors to the available video output ports (e.g., DisplayPort, HDMI, VGA) on the rear of the computer. Windows will automatically detect the displays. You can configure display settings by right-clicking on the desktop and selecting "Display settings" to extend or duplicate your desktop.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the computer. For stubborn dirt, slightly dampen the cloth with water. Avoid using harsh chemicals or abrasive cleaners.
- **Ventilation:** Ensure that the ventilation openings are not blocked to prevent overheating. Regularly clean dust from the vents using compressed air.
- **Software Updates:** Regularly update your Windows operating system and drivers to ensure security

and optimal performance.

- **Data Backup:** Periodically back up important data to an external drive or cloud storage to prevent data loss.

7. TROUBLESHOOTING

Problem	Possible Solution
Computer does not power on.	Ensure the power cable is securely connected to both the computer and the electrical outlet. Verify the electrical outlet is functional. Check the power supply unit (PSU) for any indicator lights.
No display on monitor.	Ensure the monitor is powered on and connected correctly to the computer's video output port. Check the monitor's input source setting. Try connecting to a different video port or monitor if available.
Peripherals (mouse/keyboard) not responding.	Ensure they are properly connected to the USB ports. Try connecting them to different USB ports. Restart the computer.
System is slow or unresponsive.	Close unnecessary applications. Check for background processes consuming high resources (Task Manager). Ensure sufficient free space on the hard drive. Run a system scan for malware.
