### 3. INSTALLATION INSTRUCTIONS

---

The Amig Model 11GR door knob is designed for quick and convenient installation. Ensure you have the necessary tools before beginning.

#### 3.1. Required Tools (Not Included):

- Drill
- Screwdriver
- Measuring tape or ruler

#### 3.2. Installation Steps:

1. **Prepare the Door:** Ensure the door has the appropriate boreholes for a standard door knob. If installing on a new door, follow standard door preparation guidelines for knob installation.
2. **Insert the Spindle:** Insert the square spindle (connecting rod) through the latch mechanism in the door edge.
3. **Position the Knobs:** Place one knob assembly on each side of the door, aligning the spindle with the knob's receiver. Ensure the rosette is flush against the door surface.
4. **Secure the Knobs:** Using a drill and the provided screws, securely fasten the knob assemblies to the door. Ensure both knobs are firmly attached and do not wobble.
5. **Test Operation:** Rotate both knobs to ensure they operate smoothly and retract the latch correctly.

## 4. OPERATING INSTRUCTIONS

---

To operate the Amig Model 11GR door knob, simply grasp the round knob and rotate it in either direction

(clockwise or counter-clockwise) to retract the door latch. Release the knob to allow the latch to extend and secure the door. This model does not include a locking mechanism.

## 5. MAINTENANCE

---

The stainless steel construction of the Amig Model 11GR door knob ensures high resistance to corrosion and wear, requiring minimal maintenance.

- **Cleaning:** Clean the surface regularly with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the matte finish.
- **Lubrication:** If the knob mechanism feels stiff over time, apply a small amount of silicone-based lubricant to the moving parts of the latch and spindle. Do not over-lubricate.
- **Inspection:** Periodically check all screws and connections to ensure they remain tight. Tighten any loose screws to maintain optimal performance and prevent wobbling.

## 6. TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Knob is loose or wobbly.	Mounting screws are loose.	Tighten the mounting screws on both sides of the door.
Knob is stiff or hard to turn.	Lack of lubrication or debris in the mechanism.	Apply silicone-based lubricant to the spindle and latch mechanism. Clean any visible debris.
Latch does not retract fully.	Misalignment of components or obstruction.	Check for proper alignment of the spindle and knob assemblies. Ensure no obstructions are preventing latch movement. Re-install if necessary.

## 7. WARRANTY AND SUPPORT

---

**Manufacturer's Warranty:** This product is covered by the manufacturer's warranty in accordance with the legal regulations in force in the country of purchase.
