IMPORTANT SAFETY INFORMATION

WARNING: To reduce the risk of injury, adult supervision is required at all times. Always ensure the child wears appropriate safety gear, including a helmet, when operating this ride-on toy.

- Never use on roadways, near motor vehicles, on or near steep inclines or steps, swimming pools, or other bodies of water.
- Always wear shoes.
- Never allow more than one rider.
- Ensure the ride-on is fully charged before each use to prevent unexpected power loss.
- Regularly inspect the product for damage, loose parts, or wear before each use.
- This product is designed for children aged 36 months to 6 years, with a maximum weight capacity of 44 lbs (20 kg).

This product meets U.S. Federal safety standards for ASTM F963-17 & CPSIA.

SETUP AND ASSEMBLY

Before assembly, ensure all components are present and undamaged. Refer to the included Assembly Guide for detailed, step-by-step instructions specific to your model.

Initial Battery Charging

1. Locate the 6V rechargeable battery and the included charger.
2. Connect the charger to the battery and then plug it into a standard wall outlet.
3. Allow **8-12 hours** for the initial charge. Do not overcharge.
4. The battery should be charged overnight before the first use.

Assembly Overview

- Attach the handlebars securely.
- Install the front wheel and fender.
- Mount the training wheels for added stability.
- Connect the battery as per the Assembly Guide.

Training Wheels Included

Added support helps your little rider develop their balance with confidence

Treaded Tires

Easy to Ride

Image: Rear view of the ride-on motorcycle highlighting the installed training wheels and treaded tires, designed for stability and ease of riding.

OPERATING INSTRUCTIONS

Starting the Motorcycle

1. Ensure the battery is fully charged and properly connected.
2. Locate the power switch (usually near the dashboard or seat) and turn it to the "ON" position.
3. Press the ignition button for realistic starting sounds.

Driving the Motorcycle

- To move forward, press the foot pedal or handlebar button (depending on model configuration).
- Steer using the handlebars. The motorcycle has a top speed of approximately 2 mph.
- Release the foot pedal or handlebar button to stop the motorcycle.
- The ride-on is equipped with working headlights, a horn, blinker sounds, and music for an interactive experience. Activate these features using the buttons on the dashboard.

It's Go Time!

Interactive music, working headlights,
realistic design; tots, start your engines!

CARE AND MAINTENANCE

Battery Care

- Recharge the 6V battery after each use. A full charge provides up to 40 minutes of ride time.
- Charge time is typically 8-12 hours. Do not charge for more than 18 hours to prevent battery damage.
- If the product is not used for an extended period, charge the battery at least once a month to prolong its lifespan.
- Store the battery in a cool, dry place.

Cleaning and Storage

- Clean the motorcycle with a soft, damp cloth. Do not use abrasive cleaners or solvents.

- Avoid spraying water directly onto electrical components.
- Store the motorcycle indoors in a dry area when not in use, away from direct sunlight and moisture.

Rechargeable Battery

Charger included so your little motorcyclist can ride again and again

40+

Ride up to 40 minutes per charge

8-12 Hour Charge Time

Rechargeable SLA - 6V 4.5AH

Image: A close-up of the front wheel and a graphic indicating the rechargeable SLA - 6V 4.5AH battery, 8-12 hour charge time, and 40+ minutes ride time per charge.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Motorcycle does not move.	Battery is low or not charged. Power switch is off. Loose battery connection.	Charge the battery for 8-12 hours. Turn the power switch to "ON". Check battery terminals and connections.

Problem	Possible Cause	Solution
Motorcycle moves slowly.	Battery is low. Overloaded (exceeds 44 lbs). Operating on uneven or soft surfaces.	Recharge the battery. Ensure rider weight is within limits. Operate on hard, flat surfaces.
Lights or sounds do not work.	Loose wire connection. Battery is low.	Check all wire connections. Recharge the battery.
Charger gets warm during charging.	Normal operation.	This is normal. If it becomes excessively hot, discontinue use and contact support.
