Instruction Manual

HOT SPRING SPAS GRANDEE FRESHWATER AG+ CONTINUOUS SILVER ION CLEANER

1. Introduction

This manual provides essential information for the proper use and maintenance of your Hot Spring Spas Grandee Freshwater Ag+ Continuous Silver Ion Cleaner. This product is designed to keep your spa water clean and crystal clear, offering a halogen-free solution that also enhances the performance of ozone systems.

The Freshwater Ag+ Continuous Silver Ion Cleaner is a replacement cartridge compatible with Hot Spring, Tiger River, Hotspot, Solana, and Limelight hot tubs. Each cartridge is designed to last approximately four months, simplifying spa water management.

2. Safety Information

CAUTION: KEEP OUT OF REACH OF CHILDREN.

Always handle the product with care. Avoid contact with eyes and skin. In case of contact, rinse thoroughly with water. Do not ingest. If swallowed, seek immediate medical attention.

Store the product in its original packaging in a cool, dry place, away from direct sunlight and incompatible materials. Ensure the storage area is well-ventilated. Dispose of used cartridges according to local regulations for chemical waste.

3. Product Overview

The Hot Spring FreshWater Ag+ Continuous Silver Ion Cleaner utilizes silver ions to continuously sanitize your spa water. This technology helps to reduce the need for traditional halogen-based sanitizers, providing a more natural and gentle spa experience.

This image displays six individual boxes of FreshWater® Mineral Spa Sanitizer. Each box features the 'freshwater' logo vertically on the left side and states 'FreshWater® Mineral Spa Sanitizer - Keeps spa water clean and crystal clear!' The active ingredients are listed as 0.92% Metallic Silver** (from Silver Nitrate) and 99.08% other ingredients, totaling 100.00%. A caution notice 'KEEP OUT OF REACH OF CHILDREN' is prominently displayed, along with EPA registration and establishment numbers, net contents (98 grams or 0.22 lbs.), and

spa capacity (Up to 500 gallons). A 'Nature2 Mineral Sanitizer for Spas' logo is visible at the bottom.

Each cartridge contains 98 grams (0.22 lbs.) of product and is designed for spas up to 500 gallons in capacity. The active ingredient is 0.92% Metallic Silver (from Silver Nitrate), with the remaining 99.08% consisting of other ingredients.

4. Setup and Installation

1. **Prepare Your Spa:** Before installing a new cartridge, ensure your spa water is balanced according to your spa manufacturer's recommendations. This includes pH, alkalinity, and calcium hardness.
2. **Locate Filter Compartment:** Identify the filter compartment or designated cartridge housing within your Hot Spring, Tiger River, Hotspot, Solana, or Limelight hot tub. Refer to your spa's owner's manual for the exact location.
3. **Remove Old Cartridge (if applicable):** If replacing an existing cartridge, carefully remove the old one and dispose of it properly.
4. **Install New Cartridge:** Insert the FreshWater Ag+ Continuous Silver Ion Cleaner cartridge into the designated housing. Ensure it is securely seated according to your spa's design.
5. **Initial Operation:** Once installed, the cartridge will begin releasing silver ions into the water. It is recommended to run your spa's filtration system for a few hours after installation to help distribute the ions.

5. Operating Instructions

The FreshWater Ag+ Continuous Silver Ion Cleaner operates continuously once installed. It works in conjunction with your spa's filtration system to maintain water clarity and sanitation.

- **Continuous Action:** The cartridge slowly releases silver ions into the spa water, providing ongoing sanitation.
- **Duration:** Each cartridge is effective for approximately four months. Mark your calendar for replacement to ensure continuous water quality.
- **Water Testing:** Regularly test your spa water for pH, alkalinity, and calcium hardness. While this product reduces the need for halogen sanitizers, maintaining balanced water chemistry is crucial for optimal performance and spa longevity.
- **Ozone System Compatibility:** This cleaner is designed to improve the performance of ozone systems, working synergistically to enhance water quality.

6. Maintenance

Beyond the regular replacement of the silver ion cartridge, general spa maintenance practices are essential for a clean and healthy spa environment.

- **Cartridge Replacement:** Replace the FreshWater Ag+ Continuous Silver Ion Cleaner cartridge every four months. Consistent replacement ensures effective sanitation.
- **Filter Cleaning:** Regularly clean your spa filters to ensure proper water circulation and filtration. Clogged filters can reduce the effectiveness of any sanitizer.
- **Water Changes:** Periodically drain and refill your spa according to your spa manufacturer's recommendations, typically every 3-4 months, to prevent the buildup of dissolved solids.
- **Surface Cleaning:** Wipe down the spa shell and cover regularly to prevent the buildup of grime and mildew.

7. Troubleshooting

If you experience issues with your spa water quality while using the FreshWater Ag+ Continuous Silver Ion Cleaner, consider the following:

- **Cloudy Water:**

- Check water balance (pH, alkalinity, calcium hardness).
- Ensure filters are clean and operating correctly.
- Verify the cartridge is not expired (replace every four months).
- Consider a shock treatment if organic contaminants are high.

- **Odor:**

- An unusual odor may indicate a need for a shock treatment or a water change.

- **Low Sanitation Levels:**

- Confirm the cartridge is properly installed and not past its four-month lifespan.
- Ensure adequate water circulation through the filter compartment.

For persistent issues, consult your spa dealer or a qualified spa technician.

8. Specifications

Product Name	FreshWater® Mineral Spa Sanitizer
Brand	Hot Spring
Model Number	71325-6 Pack
ASIN	B072BGND6L
UPC	600291234131
