Kingsleeve 104163

Kingsleeve Half Parasol User Manual

Model: 104163

Introduction and Product Overview

This manual provides essential information for the safe and effective use of your Kingsleeve Half Parasol. Please read these instructions carefully before assembly and operation, and retain them for future reference.

The Kingsleeve Half Parasol is specifically designed for patios, terraces, small gardens, or balconies. Its unique half-round shape allows for placement directly against a wall, optimizing space. It features an integrated crank system for easy opening and closing, a ventilation cap for improved air circulation and wind stability, and offers 50+ UV protection. The parasol is constructed with a stable steel frame and a water-repellent canopy.

Safety Instructions

To ensure safe operation and prevent damage, please observe the following safety guidelines:

- Always close the parasol in strong winds, heavy rain, or during thunderstorms to prevent damage to the parasol or surrounding property.
- Ensure the parasol base (not included) is sufficiently heavy and stable to prevent tipping.
- Do not place the parasol near open flames, barbecues, or other heat sources.
- Keep children and pets away from the parasol during opening and closing operations.
- Regularly inspect all components for wear, damage, or loose connections. Do not use if damaged.

Package Contents

Please check that all components are present and undamaged:

- 1x Kingsleeve Half Parasol (Canopy and Pole Assembly)

Note: A suitable parasol base is not included and must be purchased separately.

Setup and Assembly

The Kingsleeve Half Parasol is designed for straightforward assembly. Follow these steps:

1. Carefully unpack all components and lay them out on a clean, flat surface.
2. Insert the lower section of the parasol pole into a sturdy, compatible parasol base. Ensure the base is placed on a flat, stable surface, ideally against a wall for the half-round design.
3. Tighten any securing screws or knobs on the parasol base to firmly hold the pole in place.
4. Gently open the parasol canopy using the crank mechanism (refer to "Operating Instructions" below) to ensure it functions correctly and there are no obstructions.

Operating Instructions

The parasol features an easy-to-use crank system for opening and closing.

- **To Open the Parasol:** Locate the crank handle on the pole. Turn the handle clockwise until the parasol canopy is fully extended and taut. Do not overtighten.
- **To Close the Parasol:** Turn the crank handle counter-clockwise until the parasol canopy is fully retracted and folded. Secure any ties if present to keep the canopy neatly folded.

The integrated ventilation cap at the top of the canopy allows for air circulation, reducing wind pressure and heat build-up underneath the parasol.

Maintenance and Care

Proper maintenance will extend the life of your parasol:

- **Canopy Cleaning:** The 100% polyester canopy is water-repellent. Clean it regularly with a soft brush or cloth, mild soap, and lukewarm water. Rinse thoroughly and allow the canopy to air dry completely before closing or storing to prevent mold and mildew.
- **Frame Care:** The robust steel frame should be wiped clean with a damp cloth. Inspect for any signs of rust or corrosion, especially on moving parts. Apply a rust-inhibiting spray if necessary.
- **Crank Mechanism:** Periodically check the crank for smooth operation. If it becomes stiff, apply a small amount of silicone-based lubricant to the moving parts.
- **Storage:** When not in use for extended periods or during adverse weather conditions, close the parasol and store it in a dry, protected area, ideally in a protective cover.

Troubleshooting

Problem	Possible Cause	Solution
Parasol not opening/closing smoothly.	Crank mechanism is stiff or obstructed.	Check for debris or damage. Apply a silicone-based lubricant to the crank mechanism.
Parasol is unstable or tips over.	Parasol base is too light or not properly secured.	Ensure you are using a sufficiently heavy and stable parasol base. Tighten all securing screws. Consider adding additional weights to the base.
Canopy shows signs of fading or wear.	Normal exposure to elements over time.	This is typical wear. To minimize, store the parasol in a protective cover when not in use for extended periods.

Specifications

Feature	Detail
Model Number	104163
Brand	Kingsleeve
Canopy Material	100% Polyester
Pole Material	Steel
Frame Material	Alloy Steel
Diameter	Approx. 2.7 m (8.86 ft)
Depth	Approx. 1.5 m (4.92 ft)
Height	Approx. 2.3 m (7.55 ft)
Pole Diameter	38 mm (1.5 inches)
UV Protection	50+
Weight	5 kg (11 lbs)
Available Colors	Red, Cream, Anthracite, Terracotta
