

## PIGEON 17505

# PIGEON Rapid Steam Sterilizer Model 17505 User Manual

Your guide to safe and effective sterilization.

## 1. IMPORTANT SAFEGUARDS

Please read all instructions carefully before using the PIGEON Rapid Steam Sterilizer. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- Always keep the appliance out of reach of children.
- Do not immerse the base unit in water or other liquids.
- Use only distilled water or purified water to prevent limescale buildup.
- Ensure the appliance is placed on a stable, heat-resistant surface.
- Do not open the lid during operation or immediately after the sterilization cycle, as hot steam will be released.
- Unplug the sterilizer from the power outlet when not in use and before cleaning.
- Do not operate the appliance if the cord or plug is damaged, or if the appliance malfunctions.
- This appliance is intended for household use only.

# Safe & durable for long-term use

**Energy saving  
auto-off  
feature**

**High grade  
PP plastic  
material**

**High heat  
resistance  
up to 120°C**

**BPA free**

**pigeon**

**Image 1.1:** The sterilizer is designed for safe and durable long-term use, featuring an energy-saving auto-off function, high-grade PP plastic, high heat resistance up to 120°C, and is BPA-free.

## 2. PRODUCT OVERVIEW

The PIGEON Rapid Steam Sterilizer provides a fast and effective way to sterilize baby bottles and accessories, ensuring they are free from harmful bacteria. It features a quick 6-minute sterilization cycle and can keep contents sterile for up to 24 hours if the lid remains unopened.

### Components:

- Base Unit with Heating Plate
- Removable Tray (for bottles and accessories)
- Translucent Lid
- Power Cord

**Image 2.1:** The PIGEON Rapid Steam Sterilizer, shown with its packaging, emphasizes its quick and easy operation, 6-minute sterilization cycle, compatibility with nursing bottles, and auto switch-off feature.

# Large storage

holds up to 5 nursing bottles  
& feeding accessories

**pigeon**

**Image 2.2:** The sterilizer's interior, demonstrating its large storage capacity capable of holding up to 5 nursing bottles and various feeding accessories.

### 3. SETUP AND PREPARATION

Before first use, ensure all components are clean. Refer to the "Maintenance and Cleaning" section for initial cleaning instructions.

1. **Placement:** Place the sterilizer on a flat, stable, and heat-resistant surface, away from direct sunlight and heat sources.
2. **Water Addition:** Pour the recommended amount of water (typically 70-80ml, refer to specific markings if available) onto the heating plate of the base unit. *Do not overfill.*
3. **Loading Items:** Place the removable tray onto the base unit. Arrange cleaned bottles, teats, and accessories upside down on the tray, ensuring steam can circulate freely. The large capacity accommodates up to 5 nursing bottles and accessories.
4. **Lid Placement:** Securely place the translucent lid onto the tray.
5. **Power Connection:** Plug the power cord into a suitable electrical outlet.

# Effective & innovative design

**Image 3.1:** The sterilizer's design features a removable tray, offering flexibility for arranging items and simplifying maintenance. The translucent lid allows users to monitor the sterilization process.

## 4. OPERATING INSTRUCTIONS

The PIGEON Rapid Steam Sterilizer is designed for simple, one-touch operation.

1. **Start Sterilization:** Press the power button located on the front of the base unit. An indicator light will illuminate, signifying that the sterilization cycle has begun.
2. **Sterilization Cycle:** The sterilizer will generate steam to sterilize the contents. The cycle typically takes 6 minutes.
3. **Automatic Shut-off:** Once the water has evaporated and the sterilization cycle is complete, the appliance will automatically switch off. The indicator light will turn off.
4. **Cool Down:** Allow the sterilizer to cool down for several minutes before opening the lid. Use caution as residual steam and hot water may still be present.
5. **Removing Items:** Carefully lift the lid away from you to avoid steam burns. Use tongs to remove sterilized items, ensuring they do not touch unsterilized surfaces.
6. **Maintaining Sterility:** If the lid remains unopened, the contents will remain sterile for up to 24 hours.

# Keeps your baby's products sterile for up to 24 hours

**Image 4.1:** The sterilizer ensures baby products remain sterile for up to 24 hours, providing peace of mind for parents.

## 5. MAINTENANCE AND CLEANING

Regular cleaning is essential to maintain the efficiency and longevity of your sterilizer.

1. **Unplug and Cool:** Always unplug the sterilizer and allow it to cool completely before cleaning.
2. **Wipe Base Unit:** Wipe the exterior of the base unit with a damp cloth. *Never immerse the base unit in water.*
3. **Wash Removable Parts:** The removable tray and lid can be washed in warm soapy water, rinsed thoroughly, and air-dried.
4. **Descaling:** Over time, mineral deposits (limescale) may build up on the heating plate. To descale:
  - Mix 50ml of white vinegar with 100ml of water.
  - Pour the solution onto the heating plate and let it stand for 30 minutes to 1 hour, or until the limescale dissolves. Do not turn on the sterilizer during descaling.
  - Pour out the solution and rinse the heating plate thoroughly with clean water.
  - Wipe dry with a clean cloth.
5. **Storage:** Store the sterilizer in a clean, dry place when not in use.

## 6. TROUBLESHOOTING

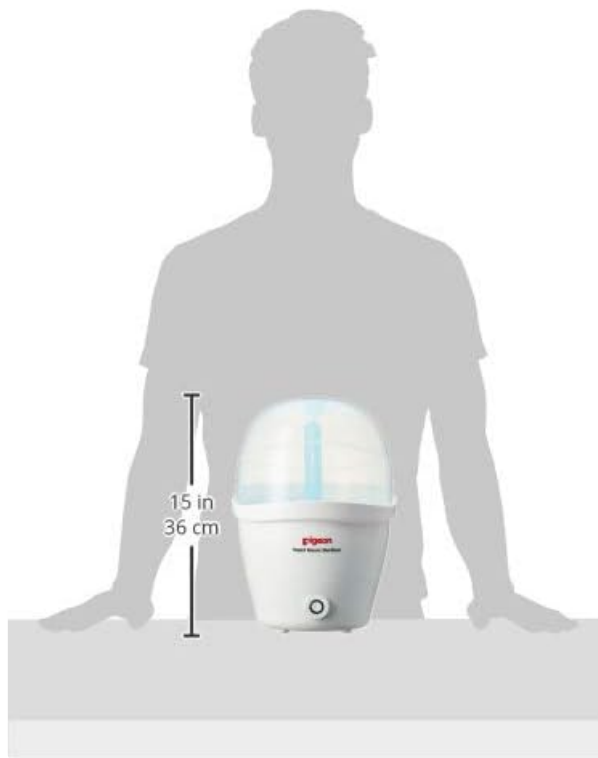

If you encounter any issues with your PIGEON Rapid Steam Sterilizer, please refer to the following common solutions:

Problem	Possible Cause	Solution
Sterilizer does not turn on.	No power supply; loose plug.	Check if the power cord is securely plugged into the outlet and the sterilizer. Ensure the power outlet is functional.
Sterilization cycle is too short or too long.	Incorrect water volume.	Ensure the correct amount of water is added to the heating plate. Refer to the "Setup" section.
White or brown residue on the heating plate.	Limescale buildup from hard water.	Descale the heating plate as described in the "Maintenance and Cleaning" section. Use distilled or purified water for future cycles.
Steam leakage from the lid.	Lid not properly seated; damaged lid.	Ensure the lid is securely placed on the tray. Inspect the lid for any damage.

If the problem persists after attempting these solutions, please contact customer support.

## 7. SPECIFICATIONS

- **Model Number:** 17505
- **Brand:** PIGEON
- **Sterilization Cycle Time:** Approximately 6 minutes
- **Sterility Duration (lid unopened):** Up to 24 hours
- **Capacity:** Up to 5 nursing bottles and accessories
- **Material:** High-grade PP plastic, BPA-free
- **Heat Resistance:** Up to 120°C
- **Product Dimensions:** 23 x 15 x 20 cm (L x W x H)
- **Product Weight:** 400 g
- **Batteries Required:** No

**Image 7.1:** Visual representation of the sterilizer's dimensions, indicating a height of approximately 36 cm (15 inches).

## 8. WARRANTY AND CUSTOMER SUPPORT

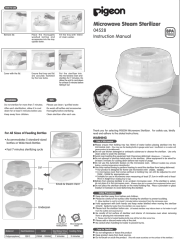

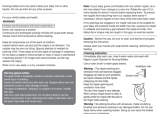

For warranty information or customer support regarding your PIGEON Rapid Steam Sterilizer Model 17505, please refer to the warranty card included with your purchase or contact PIGEON customer service directly. Contact details can typically be found on the official PIGEON website or on the product packaging. When contacting support, please have your model number (17505) and purchase date available.
