## 4. MAINTENANCE

### 4.1 Cleaning

To maintain the headset's condition, regularly wipe the earcups and headband with a soft, dry cloth. For deeper cleaning, a slightly damp cloth can be used, ensuring no moisture enters the speaker grilles or microphone. Avoid using harsh chemicals or abrasive materials.

### 4.2 Storage

Store the headset in a cool, dry place away from direct sunlight and extreme temperatures. Avoid wrapping the cable too tightly to prevent damage.

## 5. TROUBLESHOOTING

### 5.1 No Sound or Low Volume

- Ensure the USB connector is fully inserted into the device's port.
- Check the volume control wheel on the in-line unit and adjust it to an audible level.
- Verify the audio output settings on your PC or console to ensure the SOMIC G310 is selected as the default output device.
- Increase the system volume on your connected device.

## 5.2 Microphone Not Working

- Press the 'MIC' button on the in-line control unit to ensure the microphone is not muted. The microphone tip's indicator light should be active when unmuted.
- Check the microphone input settings on your PC or console to confirm the SOMIC G310 is selected as the default input device.
- Ensure the microphone arm is properly extended and positioned.
- If issues persist, try connecting the headset to a different USB port or another compatible device to rule out port-specific problems.

## 5.3 Vibration Function Not Active

- Press the 'VIB' button on the in-line control unit to activate the vibration feature.
- Ensure the audio volume is sufficiently high, as the vibration effect is often more noticeable at mid to high volume levels.
