MAINTENANCE

Cleaning the Exterior:

- Always unplug the kettle and allow it to cool completely before cleaning.
- Wipe the exterior with a soft, damp cloth. Do not use abrasive cleaners or scouring pads.

Descaling (Removing Mineral Deposits):

Over time, mineral deposits (limescale) may build up inside the kettle, especially in areas with hard water. Regular descaling is recommended to maintain performance.

1. Fill the kettle with a mixture of 1 part white vinegar and 2 parts water.
2. Boil the mixture and let it stand for at least 30 minutes, or longer for heavy buildup.
3. Empty the kettle and rinse thoroughly with fresh water several times.

4. For stubborn deposits, gently scrub the interior with a non-abrasive brush or sponge.

Filter Cleaning:

- The removable filter can be detached for cleaning. Rinse it under running water to remove any particles.
- Reattach the filter securely before using the kettle.
