OPERATING INSTRUCTIONS

Once connected, the cable facilitates two primary functions:

- **Charging Your Device:** When connected to a compatible power adapter or power bank, the cable will initiate charging for your device. Ensure your power source is active and provides sufficient power for fast charging if desired.
- **Data Transfer:** When connected to a computer, your device should typically prompt you to select a connection mode (e.g., 'File Transfer', 'Photo Transfer', 'Charging Only'). Select the appropriate data transfer mode to access files on your device from your computer. The cable supports data transfer speeds up to 480Mbps.

MAINTENANCE

To ensure the longevity and optimal performance of your Nextech USB Type-C cable, follow these maintenance guidelines:

- **Cleaning:** Keep the cable and its connectors clean and free from dust, lint, and debris. Use a soft, dry cloth for cleaning. Avoid using liquids or abrasive cleaners.
- **Handling:** Avoid sharp bends, kinks, or excessive pulling on the cable, especially near the connectors. Always grasp the connector head when plugging or unplugging, rather than pulling on the cable itself.
- **Storage:** Store the cable in a cool, dry place when not in use. Avoid extreme temperatures or direct sunlight.
- **Environmental Exposure:** Do not expose the cable to water, high humidity, or corrosive substances.

TROUBLESHOOTING

If you encounter issues with your cable, refer to the following common solutions:

- **Device Not Charging:**
 - Ensure both ends of the cable are securely connected.
 - Try using a different power adapter or power bank.
 - Test the cable with a different compatible device to rule out a device-specific issue.
- **Slow Charging:**
 - Verify that your power adapter and device both support fast charging protocols.
 - Ensure the power adapter provides sufficient output (e.g., 3A for optimal performance).
- **Data Transfer Issues:**
 - Confirm that your device is set to 'File Transfer' or 'Data Transfer' mode when connected to a computer.
 - Try connecting to a different USB port on your computer.
 - Ensure your computer's drivers for USB devices are up to date.
