2. SETUP

2.1 What's in the Box

- One (1) Cordless Phone Base unit
- Three (3) Cordless Handsets
- Two (2) Charger Units
- Six (6) Rechargeable Ni-MH AAA-size batteries

2.2 Initial Setup

1. **Connect the Base Unit:** Plug the AC adapter into the base unit and a standard electrical outlet. Connect the telephone line cord to the base unit and a telephone wall jack.
2. **Install Batteries:** Open the battery compartment on each handset and insert the provided Ni-MH AAA-size batteries, observing polarity.
3. **Charge Handsets:** Place each handset on its respective charger unit or the base unit to charge. Allow at least 7 hours for a full charge before initial use.
4. **Set Date and Time:** Follow the on-screen prompts on a handset to set the date and time. This is crucial for accurate call logging and answering machine timestamps.

5. **Handset Registration:** Handsets are typically pre-registered to the base unit. If a handset displays "Unregistered" or similar, refer to the detailed manual on the manufacturer's website for registration instructions.

3. OPERATING INSTRUCTIONS

3.1 Making and Receiving Calls

- **To Make a Call:** Press **TALK**, then dial the phone number.
- **To Answer a Call:** Press **TALK** when the phone rings.
- **Speakerphone:** During a call, press **SP-PHONE** to activate the speakerphone.

3.2 Call Block Feature

The one-touch Call Block feature allows you to register up to 150 unwanted numbers. When an unwanted call comes in, simply press the **CALL BLOCK** button on the handset or base unit to add the number to the block list.

3.3 Talking Caller ID

The system audibly announces caller information in either English or Spanish from the base unit and cordless handsets. This feature allows you to screen calls without needing to view the screen.

3.4 Answering Machine

The integrated all-digital answering machine records incoming messages. A large, easy-to-read message counter on the base unit displays the number of new messages. Use the controls on the base unit (**PLAY/STOP**, **SKIP**, **ERASE**, **VOLUME**) to manage messages.

3.5 Display and Keypads

Handsets feature 1.6-inch white backlit LCD screens for clear visibility of call functions. Soft-touch amber backlit keypads enhance readability in various lighting conditions.

4. MAINTENANCE

- **Battery Care:** Use only the specified Ni-MH AAA-size rechargeable batteries. Replace batteries when they no longer hold a charge effectively. Avoid using non-rechargeable batteries.
- **Cleaning:** Wipe the phone system and handsets with a soft, dry cloth. Avoid using liquid cleaners or abrasive materials, as these can damage the surfaces.
- **Location:** Place the base unit and charger units in a dry area, away from direct sunlight, heat sources, and excessive moisture. Ensure proper ventilation.

5. TROUBLESHOOTING

Problem	Solution
No dial tone	Check that the base unit's AC adapter and telephone line cord are securely connected. Ensure your telephone service is active.
Poor sound quality	Move closer to the base unit. Ensure no other electronic devices are causing interference. Check for a fully charged battery.
Handset does not charge	Ensure the handset is correctly seated in the charger. Clean the charging contacts on both the handset and charger with a dry cloth. Verify the charger unit is plugged into a working electrical outlet.
Answering machine not recording	Check if the answering machine is turned ON. Ensure there is sufficient memory for new messages.
