

GlocalMe U3B-black

GlocalMe Triforce Mobile Hotspot User Manual

Model: U3B-black | Brand: GlocalMe

INTRODUCTION

The GlocalMe Triforce Mobile Hotspot (Model U3B-black) is a wireless portable WiFi device designed for seamless internet connectivity across over 200 countries. Utilizing patented Cloud SIM technology, it intelligently selects the best local network, eliminating the need for physical SIM cards and roaming charges. This manual provides comprehensive instructions for setting up, operating, and maintaining your device.

Key Features:

- **No SIM Card Needed:** Patented Cloud SIM technology for intelligent network selection.
- **Global Coverage:** Access 4G internet in over 200 countries.
- **High-Speed Connectivity:** Fast and stable 4G internet for streaming, calls, and navigation.
- **Power Bank Function:** Built-in 7000 mAh battery provides power for other devices.
- **Multi-Device Connection:** Connect up to 10 devices simultaneously.

SETUP GUIDE

1. Charging the Device

Before initial use, fully charge your GlocalMe Triforce device. Use the provided USB cable and a compatible power adapter (not included). The device features a 7000 mAh battery, offering extended usage and power bank capabilities.

2. Powering On/Off

To power on, press and hold the power button located on the side of the device until the screen illuminates. To power off, press and hold the power button until the shutdown prompt appears, then confirm.

3. Initial Activation & Account Setup

Upon first power-on, the device will guide you through the initial setup. You will need to create or log in to your GlocalMe account. This account manages your data packages and device settings.

Your browser does not support the video tag.

Video 1: A brief demonstration of the GlocalMe device's physical appearance and power-on sequence.

4. Connecting to the Hotspot

On your smartphone, laptop, or tablet, search for available Wi-Fi networks. Select the network named "GlocalMe_XXXX" (where XXXX is a unique identifier for your device). Enter the default password provided on the device screen or in the user manual. You can change the Wi-Fi name and password later via the device's settings or the GlocalMe app.

OPERATING YOUR DEVICE

1. Data Package Management

The GlocalMe Triforce operates on a pay-as-you-go model with no contract or roaming charges. Purchase data packages directly through the device's touchscreen interface or the GlocalMe mobile application. Options include daily, monthly, regional, or global data plans.

2. Intelligent Network Selection

The device automatically selects the strongest and most stable 4G network available in your current location. This ensures optimal connectivity without manual intervention.

Figure 3: The GlocalMe device provides SIM-free Wi-Fi access, ideal for international travel.

3. External SIM Card Compatibility

For specific local data needs, the device supports external SIM cards. Open the SIM card slot cover and insert your micro or nano SIM card. The device will prioritize the external SIM if inserted and active.

ADVANCED FEATURES

Power Bank Functionality

With its robust 7000 mAh battery, the GlocalMe Triforce can also serve as a power bank to charge your other devices. It includes integrated USB-C, Lightning, and Micro USB cables for convenience.

MAINTENANCE AND CARE

Cleaning

Wipe the device with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials that could damage the surface.

Storage

Store the device in a cool, dry place away from direct sunlight and extreme temperatures. If storing for an extended period, ensure the battery is charged to approximately 50% to prolong its lifespan.

Battery Care

To maximize battery longevity, avoid fully discharging the device frequently. Charge it regularly and avoid leaving it plugged in for prolonged periods after it's fully charged.

TROUBLESHOOTING

No Internet Connection

- Ensure your data package is active and has sufficient balance.
- Check the device's signal strength. If the signal is weak, try moving to an area with better network coverage.
- Restart the GlocalMe device and your connected devices.
- If using an external SIM, ensure it is properly inserted and active.

Slow Connection Speed

- Verify that you are in a 4G coverage area.
- Reduce the number of connected devices.
- Check your data plan for any speed limitations after a certain usage threshold.

Device Overheating

- If the device feels warm, it's normal during heavy use. If it becomes excessively hot, disconnect all devices and power off the hotspot. Allow it to cool down before resuming use.
- Ensure the device is not covered or in an enclosed space that prevents proper ventilation.

TECHNICAL SPECIFICATIONS

| Feature | Specification |
|-------------------------------------|---|
| Model Name | U3B-black |
| Product Dimensions | 5.83 x 2.72 x 0.62 inches |

|  | |

2 Create a GlocalMe Account (In App)

- Click [Sign In] > [Create]
- Follow the steps to register an account
(You can register using an email or mobile number)

3 Purchase In-App GlocalMe Data Plans

- Choose the data plans that suit your needs (see more info you have already created an account with the purchase of your device)

4 Link Device with GlocalMe App

- Open GlocalMe App and click <[My Device]> > [Activate Device]
- Scan the device QR code on the back of the U3 module

Data Flow Protection Reminder

The product has "Data Flow Protection" function by default to prevent connected devices from consuming large data due to automatic system and application updates. After the function turns on, it might cause apps to be unable to download the APP store or unable to download applications. If needed, you can temporarily remove the restriction by visiting 192.168.4.1 in the browser.

5 Turn On U3

- Press and hold the power button for 3 seconds if you want to turn on the U3 device (lights will start to blink red and blue)
- Once the light of [U3] appears, it means your device is ready to connect

6 Connect To Wi-Fi

- Find the Wi-Fi network name and password at the back of U3
- On your mobile device, under Wi-Fi settings, search for the network and connect

[How To Use A Physical SIM Card?]

(U3 is default to use a local SIM card)

1 Insert The SIM Card

- Phone turn off your device when inserting/removing SIM card
- Open the SIM card tray with a pin and insert the SIM card as shown in the picture below (U3 device only supports Nano-SIM cards)

2 Unlock SIM Card (If PIN protected)

- If the SIM card is PIN protected, please give your mobile device in the U3 device (U3) screen and use 192.168.4.1 in your browser
Username: admin, Password: admin
Please follow the steps of the U3 device to unlock the SIM

3 Set The APN Manually

- If you still cannot connect to the network after the above steps, please set the APN manually and use 192.168.4.1 in the browser
[Settings] > [SIM card management] > [APN settings] > [Add manually]
enter the APN of your SIM card and please save and restart

4 SIM Card Selection

- Connect your mobile phone / laptop to GlocalMe Wi-Fi and visit 192.168.4.1 in the browser
- Select [SIM] on the screen of SIM Card Selection

[U3 Light Indicator]

1 Battery Check

- Press power button once for checking the battery level

2 Signal Check

- Press power button twice for checking the signal level
