Jool Baby Child Safety Strap Locks (Model MUL-104)

Instruction Manual

1. IMPORTANT SAFETY INFORMATION

Jool Baby Child Safety Strap Locks are designed to help prevent young children and pets from accessing potentially hazardous areas such as cabinets, drawers, refrigerators, and other appliances. Always supervise children, even when safety devices are installed. This product is a deterrent and not a substitute for adult supervision.

- Regularly inspect locks for proper adhesion and function.
- Discontinue use if the product becomes damaged or detached.
- Keep small parts away from children to prevent choking hazards.

**KEEP STUFF IN.
KEEP KIDS OUT.**

2. PRODUCT OVERVIEW

The Jool Baby Child Safety Strap Locks are multi-purpose adhesive locks designed to secure various household items and areas. They feature a flexible strap and strong 3M adhesive for easy, drill-free installation.

- **Multi-Use Design:** Suitable for cabinets, drawers, fridges, freezers, ovens, toilets, and trash cans.
- **No Tools Required:** Installs easily with 3M adhesive, eliminating the need for drilling.
- **Adjustable Length:** The strap can be adjusted to fit gaps between 3 to 7 inches.
- **Child-Resistant Mechanism:** Features a slide-and-pull lock that is easy for adults but difficult for toddlers.

3. PACKAGE CONTENTS

Your Jool Baby Child Safety Strap Locks package includes:

- 4 x Jool Baby Child Safety Strap Locks (Model MUL-104)

4. INSTALLATION INSTRUCTIONS

Follow these steps for proper installation to ensure maximum security:

- 1. Prepare the Surface:** Clean and dry the surfaces where the adhesive pads will be applied. Ensure they are free from dust, grease, or moisture.
- 2. Adjust Strap Length:** Slide out part 'A' from the lock mechanism and adjust the strap to the desired length. Ensure the strap is long enough to bridge the gap between the two surfaces you wish to secure, but not so long that it allows significant opening. **Note: Once locked, the strap length cannot be adjusted.**
- 3. Apply Adhesive:** Remove the protective backing from the 3M adhesive pads on both ends of the

strap lock.

- Position and Press:** Firmly press one end of the lock onto the first surface (e.g., cabinet frame). Hold for at least 30 seconds to ensure strong adhesion. Then, align the second end with the other surface (e.g., cabinet door) and press firmly, holding for 30 seconds.
- Allow to Cure:** For optimal adhesion, allow the adhesive to cure for at least 24 hours before actively using the lock.

EASY TO INSTALL

NO DRILLING REQUIRED

Slide out A and adjust the strap length as needed.

Slide A back into the lock. *Note once locked, the strap length can't be adjusted.

Remove the adhesive tape on the back, and press down firmly to install.

Slide B to open the lock.

Image: A four-panel diagram illustrating the installation process. Panel 1 shows sliding out part 'A' to adjust strap length. Panel 2 shows sliding 'A' back into the lock. Panel 3 shows removing the adhesive tape. Panel 4 shows sliding part 'B' to open the lock after installation.

5. OPERATING THE LOCKS

To open the Jool Baby Child Safety Strap Lock:

- Locate the slide button on one of the lock ends.
- Press the button and slide it to release the strap from the locking mechanism.
- Once released, the strap can be moved aside, allowing access to the secured area.

To close the Jool Baby Child Safety Strap Lock:

1. Align the free end of the strap with the locking mechanism.
2. Push the strap firmly into the mechanism until you hear a click, indicating it is securely locked.

WORKS ON ALL SURFACES

Refrigerator

Trash Can

Cabinet

Oven

Drawer

Toilet

6. MAINTENANCE AND CARE

To ensure the longevity and effectiveness of your Jool Baby Child Safety Strap Locks:

- **Cleaning:** Wipe the locks with a damp cloth and mild soap. Avoid harsh chemicals or abrasive cleaners that could damage the plastic or adhesive.
- **Adhesive Longevity:** The 3M adhesive is designed for strong, long-lasting hold. Avoid repositioning the locks frequently, as this can weaken the adhesive.
- **Removal:** If removal is necessary, gently heat the adhesive with a hairdryer on a low setting for 30-60 seconds. This will soften the adhesive, allowing for easier removal without damaging most surfaces. Carefully peel off the lock. Any remaining adhesive residue can often be removed with a soft cloth and a small amount of rubbing alcohol or a specialized adhesive remover.

7. TROUBLESHOOTING

- **Lock Not Sticking:** Ensure the surface was thoroughly cleaned and dried before application. Press firmly for the recommended time (at least 30 seconds) and allow 24 hours for the adhesive to cure. Extreme temperatures or humidity can affect adhesion.
- **Child Can Open the Lock:** Verify that the strap is adjusted to the shortest possible length that still allows the door/drawer to close. The slide-and-pull mechanism requires dexterity that most toddlers lack. If a child consistently defeats the lock, consider repositioning it or using an additional lock for enhanced security.
- **Strap Comes Loose from Mechanism:** Ensure the strap is fully inserted and clicked into place when closing. If the strap consistently detaches, the lock may be damaged and require replacement.

8. PRODUCT SPECIFICATIONS

Feature	Detail
Brand	Jool Baby
Model Name	Child Safety Strap Locks
Model Number	MUL-104
Lock Type	Child Safety Lock
Material	Plastic
Color	White
Item Dimensions (L x W x H)	10 x 6.5 x 0.5 inches
