Lion Locks 1500

Lion Locks 1500 Key Lock Box Instruction Manual

Model: 1500 | Brand: Lion Locks

Introduction

The Lion Locks 1500 Key Lock Box provides a secure and convenient solution for storing keys. This heavy-duty, weather-resistant lockbox is designed for various applications, including real estate, property management, and personal use, allowing authorized individuals access to keys via a customizable 4-digit combination. It can hold up to five standard keys and features a protective back padding to prevent damage to surfaces.

Setup Instructions

1. Setting Your Combination

The lockbox is factory preset to "0-0-0-0". To set your personal combination:

1. Open the lockbox by entering the current combination (initially "0-0-0-0") and pressing the release button.
2. Inside the lockbox, locate the reset lever on the back of the door. Move the lever from position A to position B.
3. Rotate the dials to your desired 4-digit combination. Ensure these numbers are memorable and recorded in a safe place.
4. Move the reset lever back from position B to position A.
5. Close the lockbox door and scramble the dials to secure your new combination.

Image: The lockbox features 10,000 possible combinations for enhanced security, offering a safer alternative to traditional key hiding methods.

2. Attaching the Lock Box

The lockbox is designed for versatile attachment to various fixtures.

1. With the lockbox open, locate the shackle release lever inside the top compartment.
2. Push the lever to release the shackle.
3. Place the shackle around a door handle, knob, fence, or other secure fixture.
4. Reinsert the shackle into the lockbox and ensure it clicks securely into place.
5. Close the lockbox door and scramble the dials to lock it.

Image: The lockbox attached to a doorknob, illustrating its compact size and secure fit. Dimensions are approximately 5.5 inches (13.97 cm) in height and 2.5 inches (6.35 cm) in width.

Image: The lockbox features a protective back cover to prevent scratches and damage to doors or handles during installation and use.

Operating Instructions

1. Opening the Lock Box

1. Rotate the dials to your preset 4-digit combination.
2. Press the release button located above the dials. The front cover will open.

2. Storing Keys

The lockbox compartment is designed to hold up to five standard keys.

1. Place your keys inside the compartment. Ensure they fit without forcing the door closed.

Image: Interior view of the lockbox demonstrating its capacity to hold up to five standard keys. The internal dimensions are approximately 3.0 inches (7.62 cm) in width and 1.2 inches (3.05 cm) in depth.

Image: The open lockbox with keys stored inside, showcasing its heavy-duty metal construction for durability and security.

3. Closing and Securing the Lock Box

1. Close the front cover firmly until it latches.
2. Scramble the combination dials to a random set of numbers. This secures the lockbox and prevents unauthorized access.

Maintenance

- **Cleaning:** Wipe the exterior of the lockbox with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish.
- **Lubrication:** Periodically apply a small amount of silicone-based lubricant to the shackle mechanism and combination dials to ensure smooth operation, especially in outdoor environments.
- **Inspection:** Regularly check the lockbox for any signs of wear, damage, or corrosion. Ensure the shackle and door

close securely.

- **Rust Prevention:** Although made from rust-resistant metal, prolonged exposure to harsh weather conditions can affect any metal product. Ensure the lockbox is installed in a location that minimizes direct exposure to rain and extreme humidity when possible. Regular lubrication also aids in rust prevention.

Troubleshooting

Problem	Possible Cause	Solution
Lockbox will not open.	Incorrect combination entered. Dials not aligned correctly.	Double-check the combination. Ensure each number is precisely aligned with the indicator marks. Try rotating the dials back and forth a few times to clear any internal resistance before re-entering the code.
Shackle is stuck or difficult to release.	Dirt or debris in the mechanism. Lack of lubrication.	Clean the shackle and its entry points. Apply a silicone-based lubricant to the shackle mechanism. Ensure the shackle release lever is fully engaged.
Keys do not fit inside the compartment.	Too many keys or oversized keys.	The lockbox is designed to hold up to five standard keys. Remove any excess or unusually large keys.
Combination reset lever is stuck.	Debris or misalignment.	Ensure the lockbox is fully open and the dials are set to the current correct combination before attempting to move the reset lever. Gently try to wiggle the lever. Do not force it.

Specifications

- **Model Name:** 1500
- **Model Number:** 43237-2
- **Brand:** Lion Locks
- **Material:** Metal
- **Lock Type:** Combination Lock (4-digit resettable)
- **Key Capacity:** Up to 5 standard keys
- **Special Feature:** Portable, Protective Back Padding
