

## Final E2000

# Final E2000 In-Ear Headphones User Manual

Model: E2000

## INTRODUCTION

The Final E2000 in-ear headphones are designed to deliver a high-resolution audio experience with natural sound and superb clarity. Featuring durable aluminum construction and a 3.5mm standard plug, these headphones are engineered for both exceptional sound quality and comfortable, extended listening. This manual provides essential information for setting up, operating, and maintaining your Final E2000 headphones to ensure optimal performance and longevity.

## KEY FEATURES

- **Hi-Definition 6.4mm Dynamic Driver:** Engineered for precise and detailed sound reproduction across the frequency spectrum.
- **Hi-Res Audio Certified:** Ensures high-fidelity sound, capturing the nuances of your music.
- **Durable and Stylish Black Aluminum Construction:** Provides a robust yet lightweight build for comfort and longevity.
- **Vast Concert-like Soundstage:** Acoustic design creates an expansive listening experience.
- **Powerful Bass Tones:** Delivers deep, well-defined bass frequencies.
- **3.5mm Standard Plug:** Offers broad compatibility with various audio devices.

## WHAT'S IN THE BOX

- Final E2000 Earphones
- Carry Case
- Silicon ear pieces (E type 5 sizes)
- Ear hook
- Pouch

## PRODUCT OVERVIEW

## SETUP

---

### 1. Choosing the Right Eartips

The Final E2000 comes with five sizes of silicon eartips (E type). Selecting the correct size is crucial for optimal sound quality and comfort. A proper seal ensures full bass response and effective passive noise isolation.

1. Experiment with different eartip sizes to find the best fit for your ears.
2. Insert the earpiece gently into your ear canal. The fit should feel snug but not uncomfortable.
3. Test the sound. If the bass sounds weak or the sound is thin, try a larger eartip. If it feels too tight or muffled, try a smaller size.

### 2. Connecting to Your Device

The Final E2000 headphones connect via a standard 3.5mm audio jack.

1. Locate the 3.5mm audio output port on your smartphone, tablet, computer, or audio player.
2. Insert the 3.5mm plug of the headphones firmly into the audio port until it clicks into place.
3. Ensure the volume on your device is set to a low level before playing audio to prevent sudden loud sounds.

# OPERATING INSTRUCTIONS

## Listening to Audio

Once connected, you can begin playing audio from your device. The Final E2000 headphones are designed for pure audio playback and do not feature inline controls for volume or track navigation.

- Control playback (play, pause, skip tracks) and volume directly from your connected audio device.
- For optimal sound quality, use high-resolution audio files if your device supports them.

## Wearing the Headphones

The E2000 can be worn with the cable hanging straight down or over the ear using the included ear hooks for a more secure fit, especially during activity.

- **Standard Fit:** Insert the earpieces into your ears with the cables hanging naturally.
- **Over-Ear Fit (Recommended for active use):** Attach the ear hooks to the cables near the earpieces. Loop the cable over the top of your ear, then insert the earpiece into your ear canal. This reduces cable noise and provides a more stable fit.

## MAINTENANCE

Proper care will extend the life of your Final E2000 headphones.

- **Cleaning Eartips:** Regularly remove the silicon eartips and wash them with mild soap and water. Rinse thoroughly and allow them to dry completely before reattaching.
- **Cleaning Earpieces:** Gently wipe the earpieces and cables with a soft, dry, lint-free cloth. Do not use harsh chemicals or abrasive materials.
- **Storage:** When not in use, store your headphones in the provided carry case or pouch to protect them from dust, dirt, and tangling.
- **Avoid Moisture:** Keep the headphones away from water and excessive humidity. Do not submerge them in liquid.
- **Cable Care:** Avoid sharp bends or excessive pulling on the cable, as this can damage the internal wiring.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
No sound or low volume	Cable not fully inserted.	Ensure 3.5mm plug is fully inserted.
	Device volume too low or muted.	Increase device volume and check mute settings.
	Incorrect audio output selected on device.	Verify audio output settings on your device.
	Damaged cable or earpiece.	Test with another audio device. If problem persists, contact support.
Sound is distorted or unclear	Poor eartip seal.	Try different eartip sizes for a better seal.
	Audio source quality is low.	Use higher quality audio files or streaming services.
	Earpiece nozzle clogged.	Gently clean the earpiece nozzle (refer to Maintenance).
	Damaged driver.	Contact support if cleaning doesn't resolve the issue.

Problem	Possible Cause	Solution
Headphones are uncomfortable	Incorrect eartip size. Improper insertion.	Experiment with smaller eartip sizes. Ensure earpieces are inserted gently and not forced.

## SPECIFICATIONS

Feature	Detail
Model Name	E2000
