MAINTENANCE

Proper maintenance will ensure the longevity and appearance of your Vicco Rick Corner Kitchen Unit.

- **Cleaning Surfaces:** Wipe all surfaces with a soft, dry cloth. For stubborn stains, a slightly damp cloth with mild soap can be used, followed immediately by drying with a clean, dry cloth.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, strong detergents, or solvents, as these can damage the melamine resin coating.
- **Moisture Protection:** Immediately wipe up any spills, especially water, to prevent swelling or damage to the engineered wood.
- **Hardware Check:** Periodically check all screws, hinges, and drawer slides for tightness. Tighten any loose fittings to maintain structural integrity.

Troubleshooting

This section addresses common issues you might encounter with your kitchen unit.

- **Wobbly Cabinets:** Check the adjustable legs. Ensure they are all in firm contact with the floor and adjusted to level the unit.
- **Doors Not Closing Properly:** Adjust the hinges. Most hinges have screws for horizontal, vertical, and depth adjustments. Refer to the hinge manufacturer's instructions if specific adjustments are unclear.
- **Drawers Sticking:** Check if the drawer slides are clean and free of debris. Ensure the drawer is correctly seated on the slides. Lubricate slides with a silicone-based spray if necessary.
- **Water Leaks (Sink Unit):** Immediately turn off the water supply. Check all connections for tightness. If the leak persists, consult a qualified plumber.
- **Scratches on Worktop:** Minor scratches can sometimes be minimized with furniture repair kits designed for laminate surfaces. Deep scratches may require professional repair or replacement of the affected section.
