

Gallagher S40

Gallagher S40 Solar Fence Charger Instruction Manual

Model: S40 (G345404)

1. INTRODUCTION

The Gallagher S40 Solar Fence Charger is a portable, fully integrated solar energizer designed for electric fencing applications. It provides reliable power for containing livestock, poultry, and protecting gardens from wildlife. This unit delivers 0.4 joules of stored energy, capable of powering up to 25 miles of clean fence or 5 miles of multi-wire setups. This manual outlines the proper installation, operation, and maintenance procedures to ensure optimal performance and longevity of your S40 unit.

Image 1.1: The Gallagher S40 Solar Fence Charger, a compact and portable unit with an integrated solar panel.

2. SAFETY INFORMATION

Always observe the following safety precautions when installing, operating, or maintaining your electric fence system:

- Do not connect the energizer to any other power source than specified.
- Keep children away from electric fences.
- Avoid touching the fence with your head, neck, or torso.
- Do not install electric fences near power lines or communication cables.
- Ensure proper grounding of the energizer.
- Regularly inspect the fence for damage or shorts.
- Disconnect the energizer before performing any maintenance on the fence line.
- This product is designed for animal control and exclusion. Misuse can result in injury.

3. PACKAGE CONTENTS

The Gallagher S40 Solar Fence Charger package includes the following components:

- S40 Energizer/Charger unit with integrated solar panel
- Rechargeable 6V battery (internal)
- Fence leadset (red and green alligator clips)
- User guide (this manual)

INCLUDES:

- Energizer/Charger
- Solar battery
- Leadsets
- User guide

S40 Solar Fence Energizer

Convenient fully integrated solar energizer with multiple power options. An excellent choice for livestock control and wildlife exclusion.

Image 3.1: Visual representation of the S40 unit and its included accessories: energizer, solar battery (internal), leadsets, and user guide.

4. SETUP AND INSTALLATION

Proper installation is crucial for the S40's performance. Follow these steps for optimal setup:

4.1 Mounting the Energizer

The S40 is designed for versatile mounting. It can be easily attached to T-posts, wood posts, or flat surfaces. Ensure the solar panel faces direct sunlight throughout the day for maximum charging efficiency. The unit features 360-degree mounting capability to assist with correct orientation.

Reliable Whatever the Weather

Unique battery saving technology can maintain power for up to 3 weeks without sun. Water resistant with built in lightning protection.

Image 4.1: The S40 energizer mounted on a fence post, demonstrating its portability and ease of installation in various field conditions.

4.2 Connecting to the Fence

1. **Fence Connection:** Use the red alligator clip from the provided leadset to connect the energizer's positive (+) terminal to the electric fence wire. Ensure a secure connection to the live wire.
2. **Ground Connection:** Use the green alligator clip from the leadset to connect the energizer's negative (-) terminal to a dedicated ground rod. The ground rod should be at least 3 feet long and driven fully into moist soil for effective grounding.
3. **Fence Line:** The S40 is suitable for use with Poly Wire and Turbo Wire. Ensure your fence line is clear of

vegetation to prevent shorts and maintain optimal voltage.

Quick and Easy to Install

Comes fully integrated and ready to use. Simple 360° mounting on t-posts for correct orientation toward the sun.

Image 4.2: The S40 unit installed, highlighting the solar panel and its simple connection points for quick setup.

5. OPERATION

Once installed and connected, the S40 operates automatically. The integrated solar panel charges the internal rechargeable battery during daylight hours, providing continuous power to the fence.

- **Power Indicator:** A flashing indicator light on the unit confirms that the energizer is working and delivering pulses to the fence.
- **Battery Life:** The S40 features battery-saving technology, allowing it to run for up to 3 weeks without direct sunlight, making it ideal for remote or off-grid locations.
- **Adaptive Energy Control:** The unit incorporates adaptive energy control to optimize power output and battery usage.

Portable and Super Tough

Suitable for portable fencing anywhere on the farm. The ideal choice for remote locations with unreliable or no access to mains power.

Image 5.1: The S40 operating in a field, illustrating its weather-resistant design and reliable performance even in challenging conditions.

6. MAINTENANCE

Regular maintenance ensures the longevity and effectiveness of your S40 Solar Fence Charger:

- **Solar Panel Cleaning:** Periodically clean the solar panel surface with a soft, damp cloth to remove dust, dirt, or debris that may obstruct sunlight and reduce charging efficiency.
- **Fence Line Inspection:** Regularly check the fence line for vegetation growth, broken wires, or damaged insulators that could cause shorts and reduce fence voltage. Trim vegetation as needed.
- **Battery Check:** While the battery is internal and maintenance-free under normal operation, ensure the unit receives adequate sunlight to keep it charged. Prolonged periods without sun can deplete the battery.
- **Unit Inspection:** Inspect the energizer unit for any physical damage or loose connections. The S40 features a tough, water-resistant case and built-in lightning protection, but extreme conditions may still cause wear.

7. TROUBLESHOOTING

If your S40 Solar Fence Charger is not performing as expected, refer to the following troubleshooting guide:

Problem	Possible Cause	Solution
No flashing indicator light / No power to fence	◦ Insufficient sunlight for charging ◦ Battery depleted or faulty ◦ Poor fence or ground connections ◦ Heavy vegetation on fence line causing a short ◦ Internal fault	◦ Relocate the energizer to an area with maximum direct sunlight. ◦ Allow several days of full sun for the battery to recharge. If the issue persists, contact support. ◦ Check all leadset connections to the fence and ground rod. Ensure the ground rod is firmly in moist soil. ◦ Clear all vegetation from the fence line. ◦ If all else fails, contact Gallagher customer support.
Low voltage on fence	◦ Excessive vegetation or shorts on the fence line ◦ Poor grounding ◦ Overly long fence line for energizer capacity	◦ Inspect and clear all vegetation from the fence. Repair any broken insulators or wires. ◦ Ensure the ground rod is properly installed and in moist soil. Consider adding more ground rods if soil is dry or fence is very long. ◦ Verify the fence length is within the S40's capacity (up to 25 miles clean or 5 miles typical).

8. SPECIFICATIONS

Feature	Detail
Brand	Gallagher
Model Number	G345404 (S40)
Stored Energy	0.4 Joules
Fence Length (Clean)	Up to 25 miles
Fence Length (Typical)	Up to 5 miles
Power Source	Solar Powered
Battery Type	Rechargeable 6V Sealed Lead Acid (internal)
Maximum Voltage	7 Kilovolts
Material	Solar panel, rechargeable battery
Item Weight	1 pound (approx. 16 ounces)
Product Dimensions	8.5 x 12 x 11 inches
Special Features	Solar Powered, Built-in lightning protection, Adaptive energy control, Water-resistant case

The Brand You Can Trust

A heritage of quality & innovation has made Gallagher the #1 selling brand of animal management products in the world, since 1938.

Image 8.1: The S40 unit showcasing its robust design and key features for reliable fence energizing.

9. WARRANTY AND SUPPORT

The Gallagher S40 Solar Fence Charger is backed by a full 3-year manufacturer's warranty, covering defects in materials and workmanship under normal use.

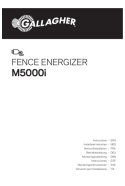

For technical assistance, warranty claims, or further information, please contact Gallagher customer support. Refer to the official Gallagher website for the most current contact details.
