OPERATION AND USAGE

Your 1-Tier organizer is designed for easy access and efficient storage. The sliding basket allows you to reach items stored at the back of your cabinet without difficulty.

- **Sliding Access:** Gently pull the basket forward to access contents, and push it back to store. The smooth tracks ensure effortless movement.
- **Stackable Design:** For increased storage capacity, multiple 1-Tier units can be stacked securely on top of each other. This feature allows for vertical organization, maximizing space in taller cabinets.

MAINTENANCE

To ensure the longevity and appearance of your organizer, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the metal surfaces with a soft, damp cloth. For stubborn stains, a mild soap solution can be used. Avoid abrasive cleaners or harsh chemicals, as these may damage the finish.
- **Drying:** After cleaning, dry the organizer thoroughly to prevent water spots or potential rust, especially if used in damp environments like under a sink.
- **Inspection:** Periodically check all connections and screws to ensure they remain tight. Tighten if necessary.

TROUBLESHOOTING

If you encounter any issues with your organizer, please refer to the following common solutions:

- **Basket Not Sliding Smoothly:** Check the tracks for any obstructions or debris. Ensure the basket is correctly aligned within the tracks.
- **Instability:** Verify that the organizer is placed on a flat, level surface. Ensure all screws are tightened and the non-slip feet are properly attached.
- **Damage During Shipping:** If any parts arrived damaged, please contact Simple Houseware customer support for assistance.
