Philips 472001

Philips Hue White A19 60W Equivalent LED Smart Bulb Starter Kit Instruction Manual

Brand: Philips | Model: 472001

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Philips Hue White A19 60W Equivalent LED Smart Bulb Starter Kit. This kit includes four A19 White Bulbs and one Hue Bridge, compatible with Amazon Alexa, Apple HomeKit, and Google Assistant. The system allows you to automate and control your lighting remotely, enhancing convenience and security.

SETUP

1. Hardware Installation

1. Screw the Philips Hue A19 LED smart bulbs into your desired light fixtures. Ensure the power to the fixture is off before installation.

2. Connect the Philips Hue Bridge to your home router using the included Ethernet cable. Plug the power adapter into the Bridge and an electrical outlet.

2. Software Setup

- Download the Philips Hue mobile app from your device's app store.
- Open the app and follow the on-screen instructions to pair your Hue Bridge and discover your new smart bulbs.
- For voice control, integrate your Philips Hue system with Amazon Alexa, Apple HomeKit, or Google Assistant through their respective apps.

OPERATING INSTRUCTIONS

App Control

Use the Philips Hue app to control your lights from anywhere. You can turn lights on/off, adjust brightness, and set schedules. The app allows for remote control, ensuring you can manage your lighting even when away from home.

Voice Control

Once integrated with Amazon Alexa, Apple HomeKit, or Google Assistant, you can control your Philips Hue lights using voice commands. For example, "Alexa, turn on the living room lights" or "Hey Google, dim the kitchen lights to 50%."

Your browser does not support the video tag.

Automation and Routines

Set daily schedules and routines through the Philips Hue app to automate your lighting. This can include turning lights on at sunset, off at bedtime, or creating a "Coming Home" routine that activates lights as you approach your residence.

MAINTENANCE

Philips Hue LED bulbs are designed for long-term use and require minimal maintenance. Ensure bulbs are kept clean and free from dust. Do not use abrasive cleaners. If a bulb is not responding, try turning the power off and on at the wall switch to reset it. For optimal performance, ensure your Hue Bridge firmware and Philips Hue app are always updated to the latest versions.

TROUBLESHOOTING

- **Bulb Not Responding:** Check if the light fixture's power switch is in the 'on' position. Ensure the Hue Bridge is powered on and connected to your router. Try resetting the bulb by turning the power off and on at the wall switch.
- **Cannot Connect to Hue Bridge:** Verify the Ethernet cable is securely connected to both the Bridge and your router. Ensure the Bridge has power. Restart your router and the Hue Bridge.
- **Voice Control Issues:** Confirm that your voice assistant (Alexa, Google Assistant, HomeKit) is properly linked to your Philips Hue account in its respective app. Check your internet connection.
- **App Not Finding Bulbs:** Ensure all bulbs are powered on. In the Philips Hue app, go to Settings > Light setup > Add light and follow the discovery process.

SPECIFICATIONS

Feature	Detail
Brand	Philips
Light Type	LED
Special Feature	Energy Efficient, Motion Sensor (via accessories)
Wattage	9.5 watts
