PRODUCT OVERVIEW AND FEATURES

The Weiser San Clemente x Halifax Handleset is designed for exterior doors requiring keyed entry and enhanced security. It features a modern aesthetic with a low-profile deadbolt and a reversible interior lever.

Key Features:

- **Modern Handleset with Low-Profile Deadbolt:** Features a sleek, geometric design with a 1-inch deadbolt throw and a 1/2-inch exterior depth for a contemporary look.
- **Easy Installation:** Designed for straightforward installation in minutes using a screwdriver.
- **SmartKey Security Technology:** Provides advanced protection against break-in techniques and allows for re-keying the lock in seconds.
- **Adjustable Handle Height:** Features an adjustable bottom through-bolt for compatibility with pre-drilled doors, offering 8-13/32" through 9-11/16" height adjustment.
- **Reversible Design:** Can be installed on both right-handed and left-handed doors.

What's in the Box:

SETUP AND INSTALLATION

Follow these steps for a successful installation. A screwdriver is the only tool required for most installations.

Door Preparation:

- Ensure your door has a cross bore of 2-1/8 inches.
- The door thickness should be between 1-3/8 inches and 1-3/4 inches.
- Verify the backset is adjustable to either 2-3/8 inches or 2-3/4 inches to fit standard door operations.

WEISER MEANS HOME

*Weiser has been providing peace of mind for over 100 years —
delivering innovation, style and convenience to create home
security products designed to fit your everyday life*

Image: Visual guide detailing the installation process, including installing latches, deadbolt, handleset, interior lever, and strikes.

1. **Install Top and Bottom Latches:** Insert the latches into the door edge.
2. **Place Deadbolt on Door and Secure with Screws:** Position the deadbolt assembly and fasten it with the provided screws.
3. **Place Handleset on Door:** Ensure the handleset aligns with the existing or newly drilled holes. The adjustable through-bolt allows for flexibility.
4. **Install Interior Lever and Secure with Washer, Screw, and Screw Cover:** Attach the interior lever assembly and secure it.
5. **Install Top and Bottom Strikes:** Mount the strike plates on the door frame, aligning them with the latches and deadbolt.

Adjustable Through-Bolt:

The handleset features an adjustable bottom through-bolt connection point, providing 1-1/2 inches of adjustment. This allows the handle to fit most pre-existing door configurations by sliding vertically and horizontally for easy and accurate installation.

OPERATION

The San Clemente x Halifax handleset offers secure and convenient operation.

Locking and Unlocking:

- **From the Outside:** The handleset can be locked or unlocked using a key.
- **From the Inside:** The handleset can be locked or unlocked using the interior thumb turn or a key.

SmartKey Re-keying:

The SmartKey Security feature allows you to re-key your lock yourself in seconds, making lost or unreturned keys obsolete and providing protection against advanced break-in techniques.

WEISER®

Image: Diagram illustrating the SmartKey re-keying process, showing where the reset tool is inserted and the benefits of re-keying (e.g., for lost keys, multiple doors).

To re-key your lock:

1. Insert your functioning key and turn it 90 degrees clockwise.
2. Insert the SmartKey reset tool fully into the small hole next to the keyway.
3. Remove the reset tool and the functioning key.
4. Insert your new key fully and turn it 180 degrees counter-clockwise.
5. Your lock is now re-keyed to the new key. Test the new key to ensure proper operation.

MAINTENANCE

Proper maintenance ensures the longevity and smooth operation of your handleset.

- **Cleaning:** Clean the handleset regularly with a soft, damp cloth. Avoid abrasive cleaners, solvents, or harsh chemicals, as these can damage the matte black finish.
- **Lubrication:** Periodically apply a silicone-based lubricant to the latch and deadbolt mechanisms to ensure smooth operation. Do not use oil-based lubricants.

- **Inspection:** Routinely check all screws and components for tightness. Tighten any loose screws to prevent wear and ensure security.

TROUBLESHOOTING

If you encounter issues with your handleset, refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
Key does not turn or is stiff.	Incorrect key; debris in keyway; worn key; lock mechanism needs lubrication.	Ensure you are using the correct key. Clean keyway with compressed air. Try a new key if yours is worn. Apply silicone-based lubricant to the keyway.
Deadbolt or latch does not extend/retract fully.	Misalignment with strike plate; loose screws; debris in mechanism.	Check alignment of strike plate on door frame and adjust if necessary. Tighten all mounting screws. Clean any debris from the latch/deadbolt mechanism.
Handleset feels loose.	Mounting screws are loose.	Tighten all visible mounting screws, including those for the interior lever and exterior handleset.
SmartKey re-keying fails.	Incorrect procedure; reset tool not fully inserted; new key not fully inserted.	Review the SmartKey re-keying steps carefully. Ensure the reset tool and keys are fully inserted and turned to the correct angles.
