PetSafe 100 Yard Remote Training Collar User Manual

This manual provides comprehensive instructions for setting up, operating, maintaining, and troubleshooting your PetSafe 100 Yard Remote Training Collar. Designed for small to medium dogs, this system offers tone, vibration, and static stimulation to assist with effective training.

1. SETUP

Proper setup of your PetSafe Remote Training Collar is crucial for its effectiveness and your dog's comfort. Follow these steps to ensure correct fitting and initial charging.

1.1. Charging the System

The remote and collar are rechargeable. Use the included USB charging cable to charge both units. A full charge typically takes about 2 hours and provides up to 40 hours of battery life.

Image: PetSafe 100 Yard Remote Training Collar, showing the remote, collar, and packaging. The packaging highlights features like "Rechargeable" and "For dogs over 8 lb".

The collar features a power button that blinks green when on and red when charging is needed. The remote has a digital display showing battery life.

Video: An honest review of the PetSafe training collar, demonstrating its power button, charging port, and adjustable strap. The video highlights the collar's features and ease of use.

1.2. Fitting the Collar

A properly fitted collar ensures consistent contact for effective stimulation. The collar should be snug, allowing one finger to fit comfortably between the contact points and your dog's skin. Position the collar high on your dog's neck, just behind the ears, where the neck is narrowest.

Image: A detailed view of the PetSafe remote and collar, highlighting features such as "Slim comfort fit design," "Tone correction," "15 levels of static correction and vibration," "100 yard range, waterproof and rechargeable," and "Adjustable, 8 lb and up, 6-23 in neck."

The system includes both short and long contact points. Choose the appropriate length based on your dog's coat thickness to ensure good skin contact. The strap can be trimmed to fit your dog's neck, but consider if your dog is still growing before cutting.

Video: Instructions on how to properly fit a remote training collar on a dog. The video emphasizes positioning the collar correctly and ensuring proper contact for effective training.

2. OPERATING

The PetSafe Remote Training Collar offers three modes of stimulation: tone, vibration, and 15 levels of static stimulation. It's designed as a reinforcement tool, not a teaching tool, so ensure your dog understands commands on-leash before transitioning to off-leash training with the remote.

2.1. Finding Your Dog's Recognition Level

The recognition level is the lowest stimulation level that elicits a slight, noticeable reaction from your dog. This could be a blink of an eye, a twitch of an ear, or simply picking up their head. Avoid any vocalization or overreactions. Start at Level 1 and gradually increase until you observe this subtle response in a low-distraction environment.

Video: A professional dog trainer explains how to find your dog's correct recognition level for the remote training collar. The video emphasizes starting at a low level and observing subtle reactions.

2.2. Training Modes

- **Tone:** An audible sound from the collar, useful for gaining your dog's attention or as a warning.
- **Vibration:** A gentle vibration from the collar, offering a non-static correction option.
- **Static Stimulation:** 15 adjustable levels of static stimulation, plus tone and vibration. Higher levels have a safety lock feature.

Image: A dog running happily in a grassy area, with an overlay listing the three available training modes: Static, Tone, and Vibration. This illustrates the versatility of the training collar.

The remote features tactile buttons for easy use. The digital display is easy to read in various lighting conditions. The 100-yard range is ideal for short-range training scenarios.

Video: Demonstrates how the PetSafe Remote Dog Training Collar can improve dog behaviors. It shows various training scenarios and the remote's functionality.

2.3. Loose-Leash Training

Before using the remote for off-leash training, ensure your dog understands loose-leash walking. The goal is for your dog to walk consistently at your side, not pulling ahead or lagging behind. The remote trainer can then be used to reinforce this learned behavior in off-leash situations.

Your browser does not support the video tag.

Video: Provides tips for loose-leash training with the PetSafe system. It emphasizes teaching on-leash commands before reinforcing them off-leash with the remote trainer.

3. MAINTENANCE

To ensure the longevity and optimal performance of your PetSafe Remote Training Collar, regular maintenance is recommended.

3.1. Cleaning and Care

The collar and remote are waterproof, making them suitable for various outdoor conditions. After use, especially in wet or muddy environments, wipe down the collar and remote with a damp cloth to remove any dirt or debris. Ensure the charging port cover is securely closed to maintain waterproofing.

Image: A happy dog running freely in a park, illustrating the joy of unleashed adventures made possible by effective training.

4. TROUBLESHOOTING

If you encounter issues with your PetSafe Remote Training Collar, refer to the following common problems and solutions.

4.1. Collar Not Responding

- **Check Battery:** Ensure both the remote and collar are fully charged.
- **Proper Fit:** Verify the collar is snug and the contact points are making good skin contact. Adjust the strap or switch to longer contact points if necessary.
- **Recognition Level:** Re-evaluate your dog's recognition level in a low-distraction environment. The level might be too low to be effective.
- **Range:** Ensure you are within the 100-yard operational range of the system.

For more detailed troubleshooting or persistent issues, please contact PetSafe customer support.

5. SPECIFICATIONS

Feature	Detail
Brand	PetSafe
Model Number	PDT00-16030
Item Weight	3.68 ounces
Item Dimensions (LxWxH)	2.16 x 1.13 x 1.19 inches
Battery Type	2 Lithium Ion batteries (included)
Battery Life	Up to 40 hours
Charging Time	2 hours
Range	100 yards
Stimulation Levels	15 levels of static stimulation, plus tone and vibration
Collar Material	Nylon

Feature	Detail
