PetSafe 300 Yard Remote Training Collar

Model: PDT00-16117

INTRODUCTION

The PetSafe 300 Yard Remote Training Collar is designed to assist in the training of medium to large dogs, providing a reliable method for off-leash training in home and backyard environments. This system offers flexible training options including tone, vibration, and static stimulation, allowing for tailored correction based on your dog's needs. Its durable, waterproof design ensures functionality in various outdoor conditions, making it a versatile tool for responsible pet owners.

SETUP

Charging the Devices

Before initial use, fully charge both the remote transmitter and the receiver collar. Connect the USB charging cord to each device and a compatible USB power source. Charging typically takes approximately 2 hours and provides up to 40 hours of battery life.

Fitting the Collar

Proper collar fit is crucial for effective and safe operation. The collar should be placed on the narrowest part of your dog's neck, high up, just behind the ears. This ensures consistent contact with the skin and prevents the collar from slipping down.

1. Position the receiver module centrally on the underside of your dog's neck.
2. Adjust the strap so that it is snug, but not overly tight. You should be able to fit one finger comfortably

between the contact points and your dog's skin.

3. Ensure the contact points make direct contact with your dog's skin. If your dog has a thick coat, you may need to part the fur or use the longer contact points provided to ensure proper contact.

4. The collar strap is designed to be trimmed to fit your dog's neck. However, if your dog is still growing, consider waiting to trim the strap until they reach their full size.

Video: A professional dog trainer demonstrates how to properly fit the PetSafe Remote Training Collar on a dog's neck, emphasizing the importance of correct placement and snugness for effective training.

Image: A detailed view of the PetSafe remote and collar, highlighting key features such as the backlit display, tone correction button, 15 levels of static correction and vibration, 300-yard range, waterproof design, and adjustable strap for dogs 8 lbs and up with neck sizes 6-27 inches.

OPERATING INSTRUCTIONS

Training Modes

The PetSafe 300 Yard Remote Training Collar offers three distinct training modes:

- **Tone:** An audible sound used as a warning or positive reinforcement.
- **Vibration:** A gentle vibration, useful for sensitive dogs or as an initial warning.

- **Static Stimulation:** 15 adjustable levels of static correction. Always start at the lowest level and gradually increase until your dog responds. A safety lock feature is included for higher levels.

Image: A white dog running in a grassy area, illustrating the three available training modes: Static, Tone, and Vibration, which help train a dog to be calm and confident on-the-go.

Remote Operation

The digital remote is designed for comfortable and intuitive use, featuring tactile buttons and an easy-to-read backlit display.

- **Power Button:** Turns the remote on/off.
- **Mode Buttons:** Select between Tone, Vibration, and Static Stimulation.
- **Level Adjustment:** Use the up/down buttons to adjust the static stimulation level (1-15).
- **Training Range:** The system operates effectively up to 300 yards, ideal for backyard and park training.

The system can be expanded to train two dogs with the purchase of an additional collar. This allows for dual-dog training with a single remote.

Dual-dog training made simple with Add-A-Dog Collar

*additional collar sold separately

MAINTENANCE

- **Cleaning:** Wipe the collar and remote with a damp cloth as needed. Avoid harsh chemicals.
- **Contact Points:** Regularly check the contact points for cleanliness and ensure they are free of debris or corrosion.
- **Strap Inspection:** Periodically inspect the nylon strap for wear and tear. Replace if damaged.
- **Waterproof Feature:** Both the collar and remote are waterproof. Ensure charging ports are properly sealed when not charging to maintain water resistance.
- **Storage:** Store the device in a cool, dry place when not in use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Collar not responding to remote.	Low battery on remote or collar; out of range; improper contact point placement.	Charge both devices. Ensure you are within the 300-yard range. Adjust collar fit to ensure good skin contact.

Problem	Possible Cause	Solution
Dog not responding to stimulation.	Stimulation level too low; poor contact; dog's coat too thick.	Increase stimulation level gradually. Re-fit the collar to ensure proper skin contact. Consider using longer contact points if your dog has a thick coat.
Collar slipping or moving.	Collar is too loose.	Tighten the collar strap. Ensure one finger fits snugly between the contact points and the dog's skin.
Battery not holding charge.	Battery degradation; faulty charging cable/adapter.	Ensure proper charging connection. If issues persist, contact customer support for battery replacement or warranty information.

SPECIFICATIONS

- **Model Name:** PDT00-16117
- **Range:** Up to 300 yards
- **Stimulation Levels:** 15 levels of static stimulation, plus tone and vibration modes
- **Battery Life:** Up to 40 hours (rechargeable)
