ASSEMBLY INSTRUCTIONS

Follow the visual diagrams provided with your kit. The assembly process typically involves building the owl layer by layer from the base upwards.

- **Step 1: Base Construction** - Begin by connecting the foundational blocks as shown in the first diagram.
- **Step 2: Layered Building** - Continue adding blocks layer by layer, ensuring each piece is securely attached to the previous one. Pay close attention to color and shape placement.
- **Step 3: Detail Addition** - Attach smaller detail pieces such as eyes, wings, and ears as indicated in the later steps of the diagram.
- **Step 4: Final Check** - Once all pieces are assembled, gently press down on the entire structure to ensure all connections are firm.

Note: The instructions are primarily visual. If you encounter difficulty, re-examine the diagrams carefully. Some pieces may require a firm push to connect properly.

CARE AND MAINTENANCE

- **Cleaning:** To clean your assembled Petit Block Owl, gently wipe it with a dry, soft cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** Store the assembled model in a clean, dry place away from direct sunlight to prevent discoloration or material degradation.
- **Disassembly:** If disassembling, carefully separate the blocks to avoid damage. Store loose blocks in a secure container to prevent loss.

TROUBLESHOOTING

Problem: Blocks do not connect securely.

Solution: Ensure the blocks are aligned correctly. Apply firm, even pressure. If a block is damaged, it may not connect properly and should be replaced if possible.

Problem: Missing a piece.

Solution: Double-check the packaging and surrounding area. Due to the small size of the blocks, they can be easily overlooked. If a piece is genuinely missing, contact the retailer or manufacturer for assistance.

Problem: Assembled model is unstable.

Solution: Review the assembly steps to ensure all blocks are correctly placed and fully connected. Pay particular attention to the base and any critical support structures.
