

LigoWave NFT-2AC

LigoWave DLB-NFT-2AC Dual-Band 11AC Dual-Radio Indoor AP User Manual

Model: NFT-2AC | Brand: LigoWave

1. INTRODUCTION

The LigoWave DLB-NFT-2AC is a high-performance Wi-Fi access point designed for indoor installations. It leverages 802.11ac technology and features integrated 2.4 GHz and 5 GHz (2x2) MIMO radios, providing robust wireless connectivity. Its compact form factor and versatile mounting options make it suitable for various indoor environments.

This manual provides essential information for the proper installation, configuration, operation, and maintenance of your DLB-NFT-2AC access point.

2. KEY FEATURES

- **Dual-Band 802.11ac Wi-Fi:** Supports both 2.4 GHz and 5 GHz frequencies for flexible and high-speed wireless connections.
- **MIMO Radios:** Integrated 2x2 MIMO radios enhance wireless performance and coverage.
- **High Output Power:** Features 27dBm output power for extended range.
- **Gigabit Ethernet Ports:** Equipped with multiple Gigabit Ethernet ports, including one with 802.3af/at PoE support for simplified power delivery.
- **Flexible Network Management:** Supports Standalone, Integrated Controller, and External Controller modes for scalable network deployment.
- **Proximity Detection:** Integrated mobile device detection feature logs MAC addresses and timestamps for analytics, with an available API for integration.
- **Compact Design:** Small form factor (15cm) and sleek design for discreet indoor placement.

3. SETUP GUIDE

Follow these steps for the initial setup of your DLB-NFT-2AC access point:

1. **Unboxing:** Carefully remove the access point and its accessories from the packaging.
2. **Mounting:** Utilize the unique mounting bracket for secure indoor installation. Ensure proper ventilation around

the device.

3. **Power Connection:** Connect the access point to a power source using a compatible Power over Ethernet (PoE) switch (802.3af/at support) or a separate PoE injector. The device will power on automatically.
4. **Network Connection:** Connect the primary Gigabit Ethernet port to your network infrastructure. The additional Gigabit Ethernet ports can be used to extend the network or connect other devices.
5. **Initial Configuration:** Access the device's web interface via a connected computer. Refer to the LigoWave documentation for default IP addresses and login credentials.
6. **Controller Setup (Optional):** Decide on your network management strategy:
 - *Standalone:* Configure each device individually via its user interface. Suitable for small networks.
 - *Integrated Controller:* Designate one access point as a master to manage other devices on the same network. Ideal for small to medium-sized networks (up to 50 devices).
 - *External Controller:* For large-scale deployments, use a local or cloud-based controller for centralized management and monitoring.
7. **Firmware Update:** It is recommended to check for and install the latest firmware updates after initial setup to ensure optimal performance and security.

4. OPERATING INSTRUCTIONS

Once configured, the DLB-NFT-2AC operates as a wireless access point, broadcasting Wi-Fi signals for client devices. Its operation largely depends on the chosen management mode:

- **Standalone Mode:** Manage settings, monitor status, and view logs directly through each device's web interface.
- **Integrated/External Controller Mode:** All management, monitoring, and configuration changes are performed through the designated master AP or the external controller interface. This provides a centralized view of your network.
- **Wireless Connectivity:** Client devices can connect to the Wi-Fi network broadcasted by the access point using the configured SSID and password.
- **Proximity Feature:** The integrated mobile device detection feature continuously logs MAC addresses of devices within range. This data can be exported and utilized by compatible applications for various services.

5. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your DLB-NFT-2AC access point:

- **Firmware Updates:** Periodically check the LigoWave official website for new firmware versions. Updates often include performance improvements, bug fixes, and security enhancements.
- **Physical Cleaning:** Keep the device clean and free from dust. Use a soft, dry cloth to wipe the exterior. Do not use liquid cleaners or aerosols.
- **Environmental Conditions:** Ensure the access point operates within its specified temperature and humidity ranges. Avoid placing it in direct sunlight, near heat sources, or in excessively humid environments.
- **Cable Management:** Ensure all connected cables are securely plugged in and not under strain.
- **Configuration Backup:** Regularly back up your device's configuration settings. This allows for quick restoration in case of accidental changes or device replacement.

6. TROUBLESHOOTING

If you encounter issues with your DLB-NFT-2AC, consider the following troubleshooting steps:

- **No Power:** Verify that the PoE connection is active and the Ethernet cable is properly connected to a PoE-enabled port or injector. Check the power source.
- **No Wi-Fi Signal:** Ensure the access point is powered on and its status indicators are normal. Check the wireless settings in the device's interface to confirm Wi-Fi is enabled and configured correctly.
- **Slow Performance:** Check for network congestion, interference from other wireless devices, or outdated firmware. Consider adjusting channel settings or reviewing client device capabilities.
- **Cannot Access Web Interface:** Verify your computer's IP address is in the same subnet as the access point. Try a different web browser or clear your browser's cache. If necessary, perform a factory reset (refer to LigoWave documentation for the procedure).
- **Intermittent Connectivity:** Check for loose cable connections. Review system logs for error messages. Ensure the device is not overheating.
- **Factory Reset:** As a last resort, a factory reset can revert the device to its default settings. This will erase all custom configurations. Consult the LigoWave product guide for the specific reset procedure.

If problems persist, contact LigoWave technical support for further assistance.

7. SPECIFICATIONS

Attribute	Value
Model Number	NFT-2AC
Wireless Type	802.11ac
Frequency Bands	2.4 GHz, 5 GHz
MIMO Configuration	2x2
Output Power	27dBm
Ethernet Ports	Multiple Gigabit Ethernet ports
PoE Support	802.3af/at
Item Weight	6.6 ounces
Product Dimensions (LxWxH)	5.79 x 6.02 x 1.14 inches
Color	White
Manufacturer	LigoWave
ASIN	B0744NYD58
Date First Available	July 26, 2017
UPC	855138006413, 703624195472

8. PRODUCT OVERVIEW

Image: Two LigoWave DLB-NFT-2AC access points, showcasing their compact design and hexagonal pattern. The device lying flat displays its indicator lights.

9. WARRANTY AND SUPPORT

LigoWave products are designed for reliability and performance. For information regarding product warranty, please refer to the warranty card included with your purchase or visit the official LigoWave website.

For technical support, troubleshooting assistance, or to report issues, please visit the LigoWave support portal or contact their customer service team. Ensure you have your product model and serial number ready when seeking support.
