 - Check if the power cable is securely plugged into the TV and the wall outlet.
 - Verify the wall outlet is functioning by plugging in another device.
 - Press the power button on the TV itself, not just the remote.
- **No Picture, But Sound is Present:**
 - Ensure the correct input source is selected (e.g., HDMI1, DTV).
 - Check the cable connections between the TV and the external device.
 - Try a different HDMI cable or port.
- **No Sound, But Picture is Present:**
 - Increase the volume.
 - Check if the TV is muted.
 - Verify audio settings in the TV menu.
 - If using an external device, check its volume and audio output settings.

- **Poor Picture Quality:**

- For antenna signals, check the antenna connection and position.
- Adjust picture settings (brightness, contrast, sharpness) in the TV menu.
- Ensure the input source is providing a high-quality signal.

- **Cannot Connect to Wi-Fi/Internet:**

- Ensure your Wi-Fi router is on and functioning.
