OPERATING INSTRUCTIONS

Powering On and Off

Plug the hair dryer into an electrical outlet. The appliance is ready for use. To turn off, slide the speed switch to the "OFF" position.

Adjusting Heat and Speed Settings

The INFINITI PRO CONAIR Travel Hair Dryer features 3 heat settings (Hot, Cool, Warm) and 2 speed settings (High, Low), along with an Off position. Use the switches located on the handle to select your desired combination.

- **Heat Settings:** Slide the upper switch to select Hot, Cool, or Warm.
- **Speed Settings:** Slide the lower switch to select High, Low, or Off.

Using the Cold Shot Button

Press and hold the blue 'Cold' button to instantly deliver a burst of cool air. This feature helps to set your style and add shine.

General Drying Techniques

For best results, towel-dry hair to remove excess moisture. Section your hair and direct the airflow from roots to ends. Use the concentrator attachment for precise styling and smoothing.

MAINTENANCE

Cleaning the Removable Filter

To maintain optimal performance and extend the life of your hair dryer, regularly clean the removable rear filter. Twist or pull off the rear cap to access the filter. Remove any accumulated lint or hair with a soft brush or vacuum cleaner. Replace the filter securely.

Important: Always unplug the appliance before cleaning.

TROUBLESHOOTING

No Power

- Check if the power cord is securely plugged into a working electrical outlet.
- Verify that the outlet is receiving power by testing it with another appliance.
- Check the reset/test buttons on the plug. Press 'Reset' if it has tripped.

Reduced Airflow or Overheating

- Unplug the dryer and allow it to cool down for several minutes.
- Clean the rear air filter as described in the 'Maintenance' section. A clogged filter can restrict airflow and cause overheating.

Unusual Noises

- Unplug the dryer and check the rear filter for any obstructions. Remove any foreign objects.
- If unusual noises persist after cleaning, discontinue use and contact customer support.
