## 5. OPERATING INSTRUCTIONS: 4-IN-1 CONVERSION

The Graco Solano is designed for long-term use, converting through four stages to accommodate your child's growth.

### Conversion Modes:

1. **Crib Mode:** The initial configuration for infants. The mattress support base can be adjusted to three different heights. Always use the lowest setting once your child can sit up unassisted.
2. **Toddler Bed Mode:** Converts from the crib by removing the front rail and adding an optional toddler guardrail (sold separately). This provides a lower sleeping surface with a partial barrier.
3. **Daybed Mode:** Converts from the crib by removing the front rail entirely. This creates an open-front sleeping or lounging space.
4. **Full-Size Bed Mode:** Converts from the crib by using the headboard and optional footboard (conversion

kit sold separately) with a standard full-size mattress and bed frame.

Refer to the official PDF manual for specific instructions and required hardware for each conversion stage.
