

SolarEdge SE3000H

SolarEdge SE3000H HD Wave Grid TIE Inverter User Manual

Model: SE3000H

1. INTRODUCTION

The SolarEdge SE3000H HD Wave Grid TIE Inverter is an advanced photovoltaic (PV) inverter designed for superior solar power harvesting and exceptional reliability. It integrates sophisticated digital control technology with an efficient power conversion architecture to optimize energy production from your solar array.

This inverter includes a proprietary data monitoring receiver that collects performance data from each individual PV module's power optimizer. This data can be transmitted to a web-based SolarEdge monitoring portal, enabling comprehensive performance analysis, fault detection, and efficient troubleshooting of your PV system.

Key features include:

- High efficiency power conversion
- Integrated data monitoring
- Built-in DC safety switch
- Lightweight design for single-person installation
- Natural convection cooling for quiet operation (< 25dBA)

2. SAFETY INFORMATION

Please read and understand all safety instructions before installing, operating, or maintaining the SolarEdge SE3000H inverter. Failure to follow these instructions may result in serious injury, death, or property damage.

- **Electrical Hazard:** This device operates with high voltage DC and AC electricity. Only qualified personnel should perform installation and maintenance.
- **Disconnect Power:** Always disconnect both AC and DC power sources before performing any work on the inverter. Use the integrated DC switch and external AC disconnect.
- **Grounding:** Ensure the inverter is properly grounded according to local electrical codes.
- **Environmental Conditions:** Do not expose the inverter to excessive moisture, dust, or extreme temperatures outside its specified operating range.
- **Ventilation:** Ensure adequate ventilation around the inverter to prevent overheating.

3. PRODUCT OVERVIEW

The SolarEdge SE3000H inverter is designed for compact and efficient integration into residential and commercial solar systems. Its robust construction ensures durability and long-term performance.

Figure 1: Front view of the SolarEdge SE3000H HD Wave Grid TIE Inverter. This image displays the front of the SolarEdge SE3000H HD Wave Grid TIE Inverter. The upper section features the SolarEdge and HD Wave logos, indicating the brand and technology. The lower section includes a prominent black rotary switch, which is the integrated DC switch for safe operation. The inverter casing is white, with visible screws securing the panels.

3.1. What's in the Box

Upon unpacking, verify that all components are present:

- SolarEdge SE3000H HD Wave Grid TIE Inverter unit
- Integrated Data Monitoring Receiver
- Built-in DC Switch
- Mounting Bracket (supplied)
- Documentation (this manual, warranty information)

4. SPECIFICATIONS

The following table outlines the key technical specifications for the SolarEdge SE3000H HD Wave Grid TIE Inverter:

Attribute	Value
Model Name	SE3000H
Product Dimensions	18 x 15 x 7 inches (approx. 45.7 x 38.1 x 17.8 cm)
Item Weight	25 pounds (approx. 11.3 kg)
Acoustic Noise	< 25dBA
Cooling Method	Natural Convection

Attribute	Value
Power Source	Solar Powered
Color	White
Manufacturer	SolarEdge
Date First Available	January 10, 2019

5. SETUP AND INSTALLATION

Installation of the SolarEdge SE3000H inverter should only be performed by a certified electrician or qualified solar installer. This section provides a general overview; refer to the detailed installation guide provided with the product for specific instructions.

1. **Site Selection:** Choose a suitable location for the inverter, ensuring it is protected from direct sunlight, rain, and excessive heat. Ensure adequate clearance for ventilation and maintenance.
2. **Mounting:** The inverter is designed to be lightweight and can be installed by a single person using the supplied mounting bracket. Securely attach the bracket to a sturdy wall or structure, then mount the inverter onto the bracket.
3. **DC Wiring:** Connect the DC input cables from the PV array (via power optimizers) to the DC input terminals of the inverter. Ensure correct polarity.
4. **AC Wiring:** Connect the AC output cables from the inverter to the main electrical panel or designated AC disconnect.
5. **Grounding:** Connect the inverter to the system's grounding electrode conductor.
6. **Communication Setup:** Configure the integrated data monitoring receiver for internet connectivity to enable performance monitoring via the SolarEdge portal.
7. **Pre-Commissioning Checks:** Before applying power, perform all necessary voltage and continuity checks as per the detailed installation manual.

6. OPERATING INSTRUCTIONS

Once installed and all connections are verified, the SolarEdge SE3000H inverter can be powered on to begin energy production.

1. **Power On:**
 - Ensure the integrated DC switch on the inverter is in the "OFF" position.
 - Close the external AC disconnect switch to supply power to the inverter.
 - Turn the integrated DC switch on the inverter to the "ON" position.
2. **Startup Sequence:** The inverter will initiate a startup sequence, performing self-tests and checking grid conditions. This process may take a few minutes.
3. **Operation:** Once the startup sequence is complete and conditions are favorable (sufficient sunlight), the inverter will begin converting DC power from the PV modules into AC power for your home or the grid.
4. **Monitoring:** Access the SolarEdge monitoring portal via a web browser or mobile app to view real-time performance data, historical energy production, and system status.
5. **Shutdown:** To shut down the system, reverse the power-on sequence: first turn the integrated DC switch to "OFF", then open the external AC disconnect.

7. MAINTENANCE

Regular maintenance helps ensure the longevity and optimal performance of your SolarEdge SE3000H inverter. Always disconnect both AC and DC power before performing any maintenance.

- **Visual Inspection (Quarterly):**
 - Check for any visible damage to the inverter casing, cables, or connectors.
 - Ensure ventilation openings are clear of dust, debris, or obstructions.
 - Inspect wiring for signs of wear, fraying, or loose connections.
- **Cleaning (Annually or as needed):**
 - Gently clean the exterior of the inverter with a soft, damp cloth. Do not use abrasive cleaners or solvents.
 - Ensure the cooling fins are free of dust buildup.
- **Performance Monitoring:** Regularly check the SolarEdge monitoring portal for any alerts or performance anomalies. Address any issues promptly.
- **Professional Inspection (Every 1-3 Years):** It is recommended to have a qualified solar professional inspect your entire PV system, including the inverter, periodically.

8. TROUBLESHOOTING

This section provides basic troubleshooting steps for common issues. For more complex problems, consult the SolarEdge support resources or contact a qualified technician.

Problem	Possible Cause	Solution
Inverter not producing power	No sunlight; DC switch off; AC breaker tripped; Grid disconnected; Faulty wiring.	Check for sufficient sunlight; Ensure DC switch is ON; Check AC breaker; Verify grid connection; Inspect wiring (qualified personnel only).
Error message on monitoring portal	Communication issue; System fault; Specific component error.	Check internet connection; Refer to the SolarEdge monitoring portal's error code explanations; Contact support if persistent.
Reduced power output	Shading on PV modules; Dirty PV modules; Faulty power optimizer; Inverter derating due to high temperature.	Check for shading; Clean PV modules; Monitor individual optimizer performance via portal; Ensure adequate ventilation around inverter.

9. WARRANTY AND SUPPORT

The SolarEdge SE3000H HD Wave Grid TIE Inverter is manufactured by SolarEdge, a reputable leader in solar energy solutions.

9.1. Warranty Information

For detailed warranty terms and conditions, please refer to the official warranty document included with your product or visit the SolarEdge website. The warranty typically covers defects in materials and workmanship for a specified period from the date of purchase.

9.2. Technical Support

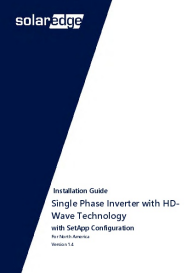

If you encounter issues that cannot be resolved using the troubleshooting guide, or require technical assistance, please

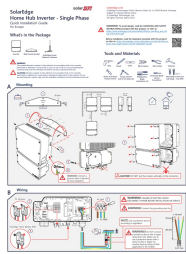

contact SolarEdge customer support. Have your inverter's serial number and purchase information ready when contacting support.

You can find contact information for SolarEdge support on their official website:

HOME BACKUP

Made in the USA

Exigible for domestic grant: SolarEdge USA, manufactured in-house, came with certain financing options, are intended to be eligible for the enhanced federal income tax credit for domestic content.	Fast and easy installation - small and lightweight, with reduced cabling system
The inverter house energy manager in charge of PV production, battery, storage, load management during a power outage (V-Charger), and smart energy devices	A reliable solution for the busy house homeowner seeking to enjoy their connection to a greener ecosystem of products
Reduced heating & cooling expenses with up to 30% EC savings	Advanced safety features with integrated anti-island protection and shutdown for IEEE1547 and IEEE610
Able to take high-AC HVAC systems during backup operation	Advanced reliability with automotive-grade components
Operates seamlessly with the complete SolarEdge home smart energy ecosystem, through intelligent home energy management	Included remote monitoring and data analysis, and O&M Class 6
Minimal external monitoring and ability to battery, PV production, and self-consumption data	NEMA 4X rated, for indoor and outdoor installation
	Compatible with central system PV, and smart energy systems while avoiding main panel upgrade

INVERTERS

12-

- Specifically designed to work with power optimizers
- Built-in module-level monitoring
- Quick and easy inverter commissioning directly from a smartphone using the SolarEdge SetApp
- Outdoor and indoor installation
- Record-breaking efficiency
- Fixed voltage inverter for longer strings
- Extremely small, lightweight and easy to install
- Advanced safety feature - integrated arc fault protection
- High reliability

Optimierte Installation mit Wechselrichtern der HD-Wave Technologie

- Speziell für die Verwendung mit Leistungsoptimierern entwickelt
- Schnelle und einfache Identifizierung der Wechselrichter direkt von der Frontansicht
- Neu entwickelte Halbleitertechnologie
- Externe Klein-Leistungswandlung und einfach zu installieren
- Hohe Zuverlässigkeit
- Built-in, optional abtrennbare Lichtbogenunterbrechung (typ. 14, 100Hz) und Spannungsunterbrechung zur Modulation
- Geeignet für die Innen- und Außenmontage
- Wechselrichter mit Festspannungsprinzip für längere Stränge
- Kompatibilität mit der SolarEdge Smart Energy Lösung

Optimized installation with HD-Wave technology

- Specifically designed to work with power optimizers
- Record breaking 98% weighted efficiency
- Quick and easy inverter commissioning directly from a smartphone using the SolarEdge SetApp
- Fixed voltage inverter for longer strings
- Integrated arc-fault protection and rapid shutdown for NEC, 2014, NEC 2017 and NEC 2020 per article 690.11 and 690.12
- UL1741 SA certified, for CPSC Rule 21 grid compliance
- Small, lightweight, and easy to install both outdoors or indoors
- Built-in module level monitoring
- Optional: faster installation with built-in consumption monitoring (1% accuracy) and production revenue grade metering (0.1% accuracy, ANSI C12.20)

Geoptimaliseerde installatie met HD-WAVE technologie

- Specifiek ontworpen om te werken met SolarEdge Power Optimizers
- Toonaangevende efficiëntie voor de sector van 200V-2C-normdimensionering
- Snelle en eenvoudige installatie van de omvormer, rechtstreeks aan de SolarEdge omvormer met behulp van de SolarEdge SetApp
- Modulaire draadloze connectiviteit met het netwerk van de SolarEdge Home Network platform
- Extremes compact, lichtgewicht en eenvoudig te installeren
- Ingebouwde monitoring op moduleniveau
- Gereedschap voor installatie buiten en binnen
- Vaste spanningsovername voor langere strings
- Geavanceerde veiligheidsfuncties: gegarandeerde veldvoeding

G12 PERC Shingled
G12 PERC Shingled Technology provides ultra-high efficiency with better performance in low irradiance. Maximum installation capacity in limited space.

Anti-LOD / PID
Built-in LED light induced degradation and potential induced degradation are actively eliminated to ensure higher actual yield during lifetime.

Mechanical Strength
Tempered glass and reinforced frame design withstands extreme weather conditions such as heavy snow and strong wind.

Reliable Warranty
Global brand with powerful financial strength, proven reliable 25-year warranty (Australia and Europe only).

Corrosion Resistant
Various tests under harsh environmental conditions such as ammonia and salt-rain passed.

UL / VDE Test Labs
Hyundai's R&D center is an accredited test laboratory of both UL and VDE.

Hyundai's Warranty Provisions
25 Year Product Warranty
25 Year Power Output Warranty
25 Year Performance Warranty

Global Energy Solutions
Established in 1967, Hyundai Motor Industry Group is one of the most trusted names in the Korean industry sector and is a global R&D company. Its global leader and innovator Hyundai Motor Industry is committed to building a future growth engine for accelerating and reaching beyond the global sustainable energy.

Certification
CE, TUV, IEC, VDE, UL, ISO 9001, ISO 14001, ISO 45001
