GIGALUMI 6838

GIGALUMI Solar Butterfly Garden Lights Instruction Manual

Model: 6838

PRODUCT OVERVIEW

The GIGALUMI Solar Butterfly Garden Lights are designed to provide decorative, color-changing illumination for your outdoor spaces. These solar-powered lights automatically charge during the day and light up at night, enhancing the ambiance of pathways, lawns, patios, and driveways.

SETUP INSTRUCTIONS

Follow these steps to correctly assemble and install your GIGALUMI Solar Garden Lights.

EASY TO INSTALL EASY TO INSTALL EASY TO INSTALL

Image: Visual guide for assembling the solar garden lights.

Assembly Steps

1. **Remove Protective Film:** Carefully remove any protective film from the solar panel.
2. **Assemble the Stake:** Connect the stake components together.
3. **Attach Accessory:** Securely attach the decorative light (butterfly, hummingbird, or dragonfly) to the top of the stake.
4. **Turn On Switch:** Locate the power switch on the underside of the solar panel and slide it to the "ON" position.
5. **Position in Sunlight:** Insert the assembled light into soft ground in a location that receives direct sunlight for at least 6-8 hours daily.

OPERATING YOUR SOLAR GARDEN LIGHTS

Your GIGALUMI Solar Garden Lights are designed for automatic operation, providing illumination from dusk till dawn.

Resistant To Bad Weather

IP65 Waterproof

Image: Illustration of solar lights charging during the day and illuminating at night.

Automatic Illumination

- The lights automatically charge their internal battery when the solar panel is exposed to direct sunlight.
- An integrated light sensor detects ambient light levels. The lights will automatically turn on at dusk and turn off at dawn.
- A full day's charge (6-8 hours of direct sunlight) typically provides 8-10 hours of continuous illumination at night.

Color Changing Feature

The lights feature a 7-color changing LED, cycling through various hues to create a dynamic visual effect in your garden.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your solar garden lights.

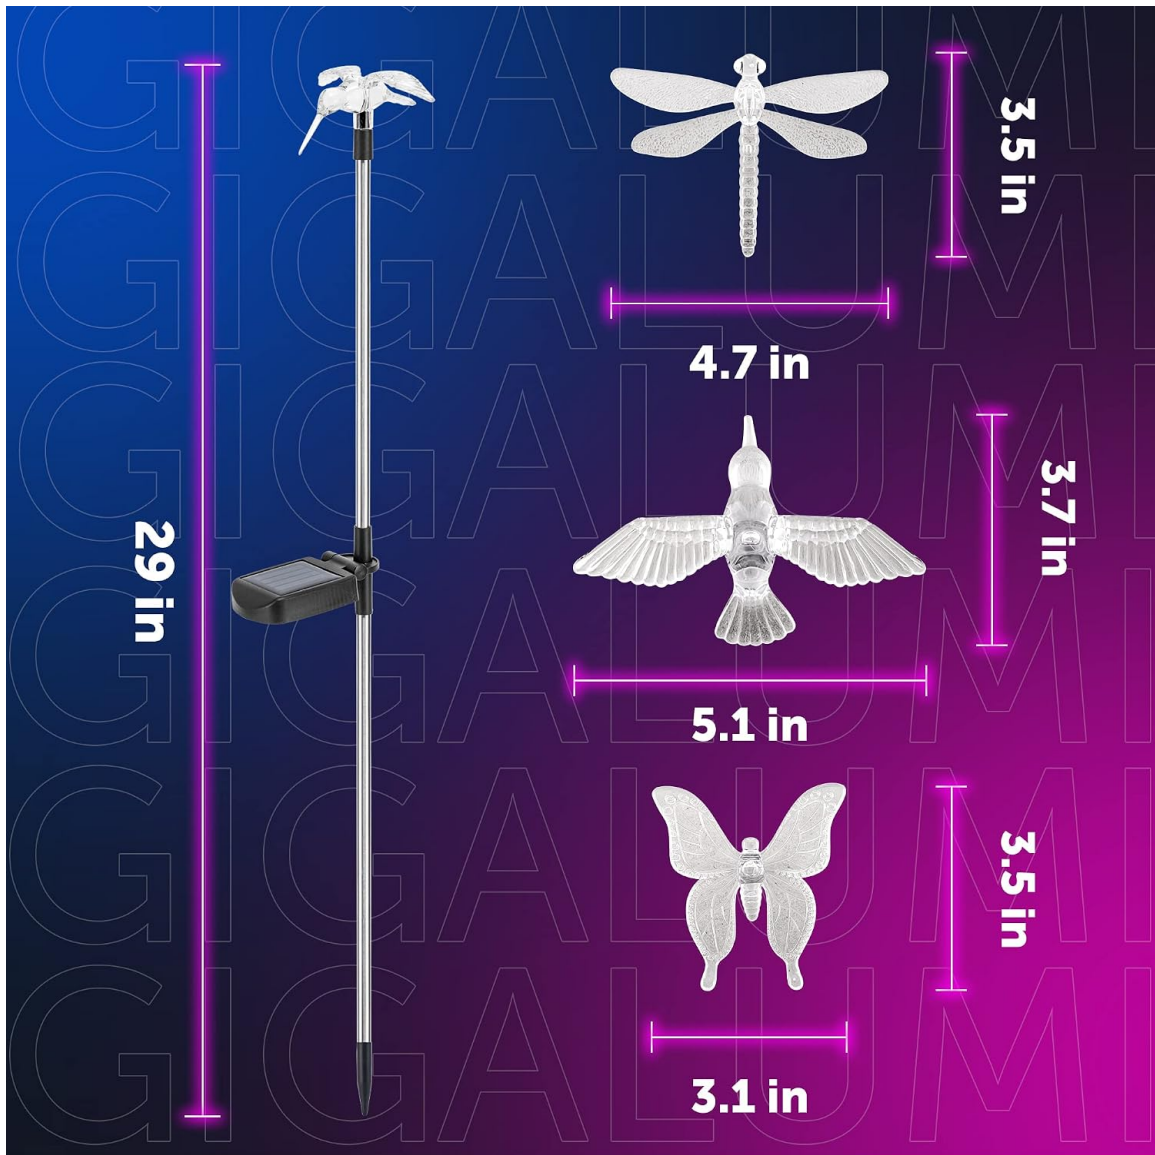

Image: Solar garden lights shown in rainy conditions, demonstrating their waterproof design.

Cleaning

- Regularly wipe the solar panel with a soft, damp cloth to remove dust, dirt, and debris. A clean solar panel is crucial for efficient charging.
- Clean the light fixtures as needed to maintain their brightness and aesthetic appeal.

Battery Care

- The lights include a rechargeable AA battery.
- If the light duration decreases significantly over time, the rechargeable battery may need replacement. Use a new rechargeable AA battery of the same type.

Weather Resistance

- The lights are designed with IP44 water resistance, making them suitable for outdoor use in various weather conditions, including rain.
- During extreme weather conditions, such as heavy snow or prolonged freezing temperatures, it is recommended to bring the lights indoors to prevent potential damage and extend their lifespan.

TROUBLESHOOTING

If your GIGALUMI Solar Garden Lights are not functioning as expected, try the following solutions:

Light Does Not Turn On At Night

- **Check the Switch:** Ensure the power switch on the solar panel is in the "ON" position.
- **Solar Panel Placement:** Verify that the solar panel is receiving at least 6-8 hours of direct, unobstructed sunlight daily. Shadows from trees, buildings, or other objects can prevent adequate charging.
- **Battery Connection:** Open the battery compartment and ensure the rechargeable battery is correctly installed and making proper contact.
- **Battery Life:** The rechargeable battery may have reached the end of its lifespan. Replace it with a new rechargeable AA battery.

Light Duration is Short

- **Sunlight Exposure:** Ensure the solar panel is positioned in an area that receives maximum direct sunlight throughout the day. Cloudy weather or short winter days can reduce charging efficiency.
- **Clean Solar Panel:** Clean any accumulated dirt, dust, or debris from the solar panel surface. A dirty panel reduces charging capability.
- **Ambient Light:** If the lights are placed near other strong light sources (e.g., streetlights, porch lights), the built-in light sensor may detect sufficient light and prevent the solar lights from turning on or cause them to turn off prematurely. Relocate the lights if necessary.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	GIGALUMI
Model Name	solar path lights
Item Model Number	6838
Power Source	Solar Powered
Light Source Type	LED
Number of Light Sources	3
Material	Plastic
Finish Type	Plastic & Stainless Steel
Product Dimensions	3.5"D x 4.7"W x 14.1"H

Feature	Detail
Item Weight	10.5 Ounces
Water Resistance Level	Water Resistant (IP44)
Battery	1 AA rechargeable battery (included)
Theme	Butterfly
Light Output Maximum	1 Lumens

WARRANTY AND SUPPORT

After-Sale Service

GIGALUMI provides 180 days of after-sales service for these solar garden lights. This service covers manufacturing defects and ensures customer satisfaction.

Contact Support

For any questions, concerns, or assistance with your GIGALUMI Solar Garden Lights, please contact our customer support team. You can typically reach us through the platform where you purchased the product or by visiting the official GIGALUMI Store.
