La-Z-Boy Delano 45833A

La-Z-Boy Delano Big & Tall Executive Office Chair User Manual

Model: Delano 45833A

IMPORTANT SAFETY INFORMATION

Please read and understand all instructions before assembling and using this chair. Retain this manual for future reference.

- Always check the instructions manual for detailed safety guidelines.
- Do not stand on the chair.
- Do not use the chair as a step stool.
- Ensure all bolts and screws are securely tightened before use. Periodically check and re-tighten as necessary.
- Do not use the chair if any parts are missing, damaged, or worn. Contact customer support for replacement parts.
- This chair is designed for single-person use.
- Maximum weight capacity: 350 pounds. Do not exceed this limit.
- Keep children away from the chair during assembly. Small parts may be a choking hazard.

PACKAGE CONTENTS

Before beginning assembly, ensure all components listed below are present and undamaged. If any parts are missing or damaged, please contact customer support.

easy-glide casters

Figure 1: Product Dimensions and Components Overview. This diagram illustrates the overall dimensions of the chair and highlights key components such as the seat, backrest, arms, and base.

Expected Components:

- Chair Backrest
- Chair Seat Cushion
- Armrests (Left and Right)
- Chair Base (5-star)
- Casters (5 pieces)
- Gas Lift Cylinder
- Mechanism Plate
- Hardware Kit (screws, washers, Allen wrench)

SETUP AND ASSEMBLY

Assembly is straightforward and typically takes about 30 minutes. For best results and safety, it is recommended to assemble the chair with two people.

1. **Attach Casters to Base:** Insert each of the five casters into the holes at the end of each leg of the chair base. Push firmly until they click into place.
2. **Insert Gas Lift into Base:** Place the larger end of the gas lift cylinder into the center hole of the

assembled chair base. Do not push down on the gas lift plunger at this stage.

3. **Attach Mechanism Plate to Seat:** Align the mechanism plate with the pre-drilled holes on the underside of the seat cushion. Ensure the front of the mechanism faces the front of the seat. Secure with the provided screws, tightening them evenly.
4. **Attach Armrests to Seat:** Attach the armrests to the sides of the seat cushion using the designated screws. Do not fully tighten the screws yet, allow for slight adjustment.
5. **Attach Backrest to Seat/Arms:** Slide the backrest into the brackets on the armrests and align with the holes on the seat. Secure the backrest to the armrests and seat using the remaining screws. Once all screws are in place, fully tighten all armrest and backrest screws.
6. **Connect Seat Assembly to Gas Lift:** Carefully place the assembled seat and backrest onto the gas lift cylinder, ensuring the mechanism plate's center hole aligns with the top of the gas lift. Press down firmly to secure.

Note: No relevant official product videos for assembly were found.

OPERATING INSTRUCTIONS

The La-Z-Boy Delano chair offers several adjustments to customize your seating experience for optimal comfort and support.

Adjusting Seat Height

To adjust the seat height, locate the lever on the right side of the chair, beneath the seat cushion. While seated, lift the lever to raise the seat. To lower the seat, lift the lever while applying slight body weight to the seat. Release the lever at the desired height.

Figure 4: Seat Height Customization. The right-side tab allows for easy adjustment of the chair's height to suit individual needs.

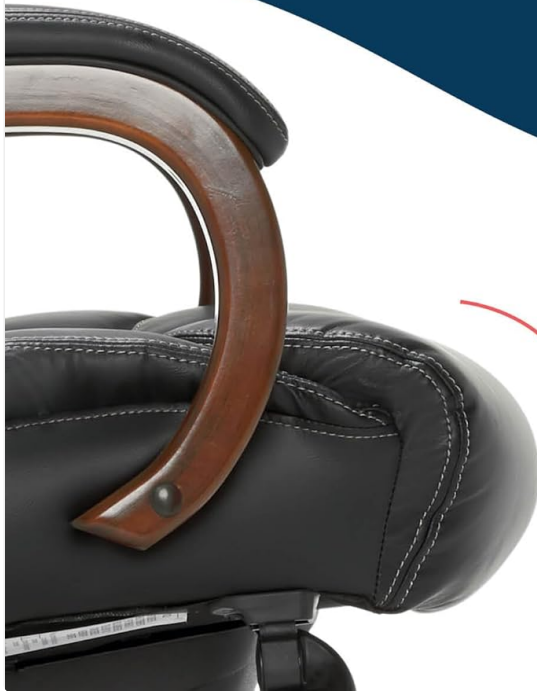

Adjusting Recline and Tilt Tension

The chair features a recline function and adjustable tilt tension. To recline, locate the lever on the left side of the chair, beneath the seat cushion. Pull the lever outwards to unlock the recline function, allowing the backrest to tilt. Push the lever inwards to lock the backrest in an upright position.

To adjust the tilt tension, rotate the round knob located at the front, underneath the seat. Turn clockwise to increase tension (making it harder to recline) and counter-clockwise to decrease tension (making it easier to recline).

Sculpted ARMRESTS

Padded armrests are shaped to naturally support a proper ergonomic position.

Waterfall SEAT EDGE

The plush, cascading seat edge promotes proper lower body alignment for enhanced comfort.

Figure 5: Recline and Relax. Easy-reach control tabs allow for personalized recline adjustment, with a knob to adjust tilt tension.

Lumbar Support and ComfortCore Cushioning

The Delano chair is designed with a pillowed lumbar zone and ComfortCore with memory foam cushioning to provide enhanced support and comfort throughout extended use. These features are integrated into the chair's design and do not require manual adjustment.

MAINTENANCE AND CARE

Proper care and maintenance will extend the life and appearance of your La-Z-Boy Delano Executive Office Chair.

- **Cleaning:** Spot clean the bonded leather upholstery with a damp cloth and mild soap. Avoid harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Wood Finish:** For the mahogany wood accents, wipe with a soft, dry cloth. Avoid excessive moisture.
- **Casters:** Periodically clean the casters to remove dust, hair, and debris that may hinder smooth movement.
- **Fasteners:** Every six months, check all bolts and screws to ensure they are tight. Re-tighten as necessary to maintain stability and prevent squeaking.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause the bonded leather to fade or crack. Position the chair away from direct sunlight when possible.

TROUBLESHOOTING

Refer to the table below for common issues and their potential solutions.

Problem	Possible Cause	Solution
Chair wobbles or feels unstable.	Loose assembly screws or uneven floor.	Check and tighten all assembly screws. Ensure the chair is on a flat, even surface.
Difficulty adjusting seat height.	Gas lift issue or mechanism obstruction.	Ensure the height adjustment lever is fully engaged. If the issue persists, the gas lift may need replacement. Contact customer support.
Chair squeaks during movement.	Loose connections or friction between parts.	Tighten all screws. Apply a small amount of silicone lubricant to moving parts if necessary, avoiding upholstery.
Casters do not roll smoothly.	Debris caught in casters or damaged casters.	Clean any hair or debris from the caster wheels. If damaged, replace the casters.
