RCF ART 710A

RCF ART 710A 1400W 10-inch Active 2-way Speaker User Manual

Model: ART 710A

INTRODUCTION

This manual provides essential information for the safe and efficient operation of your RCF ART 710A active 2-way speaker. Please read this manual thoroughly before using the product to ensure proper setup, operation, and maintenance. Retain this manual for future reference.

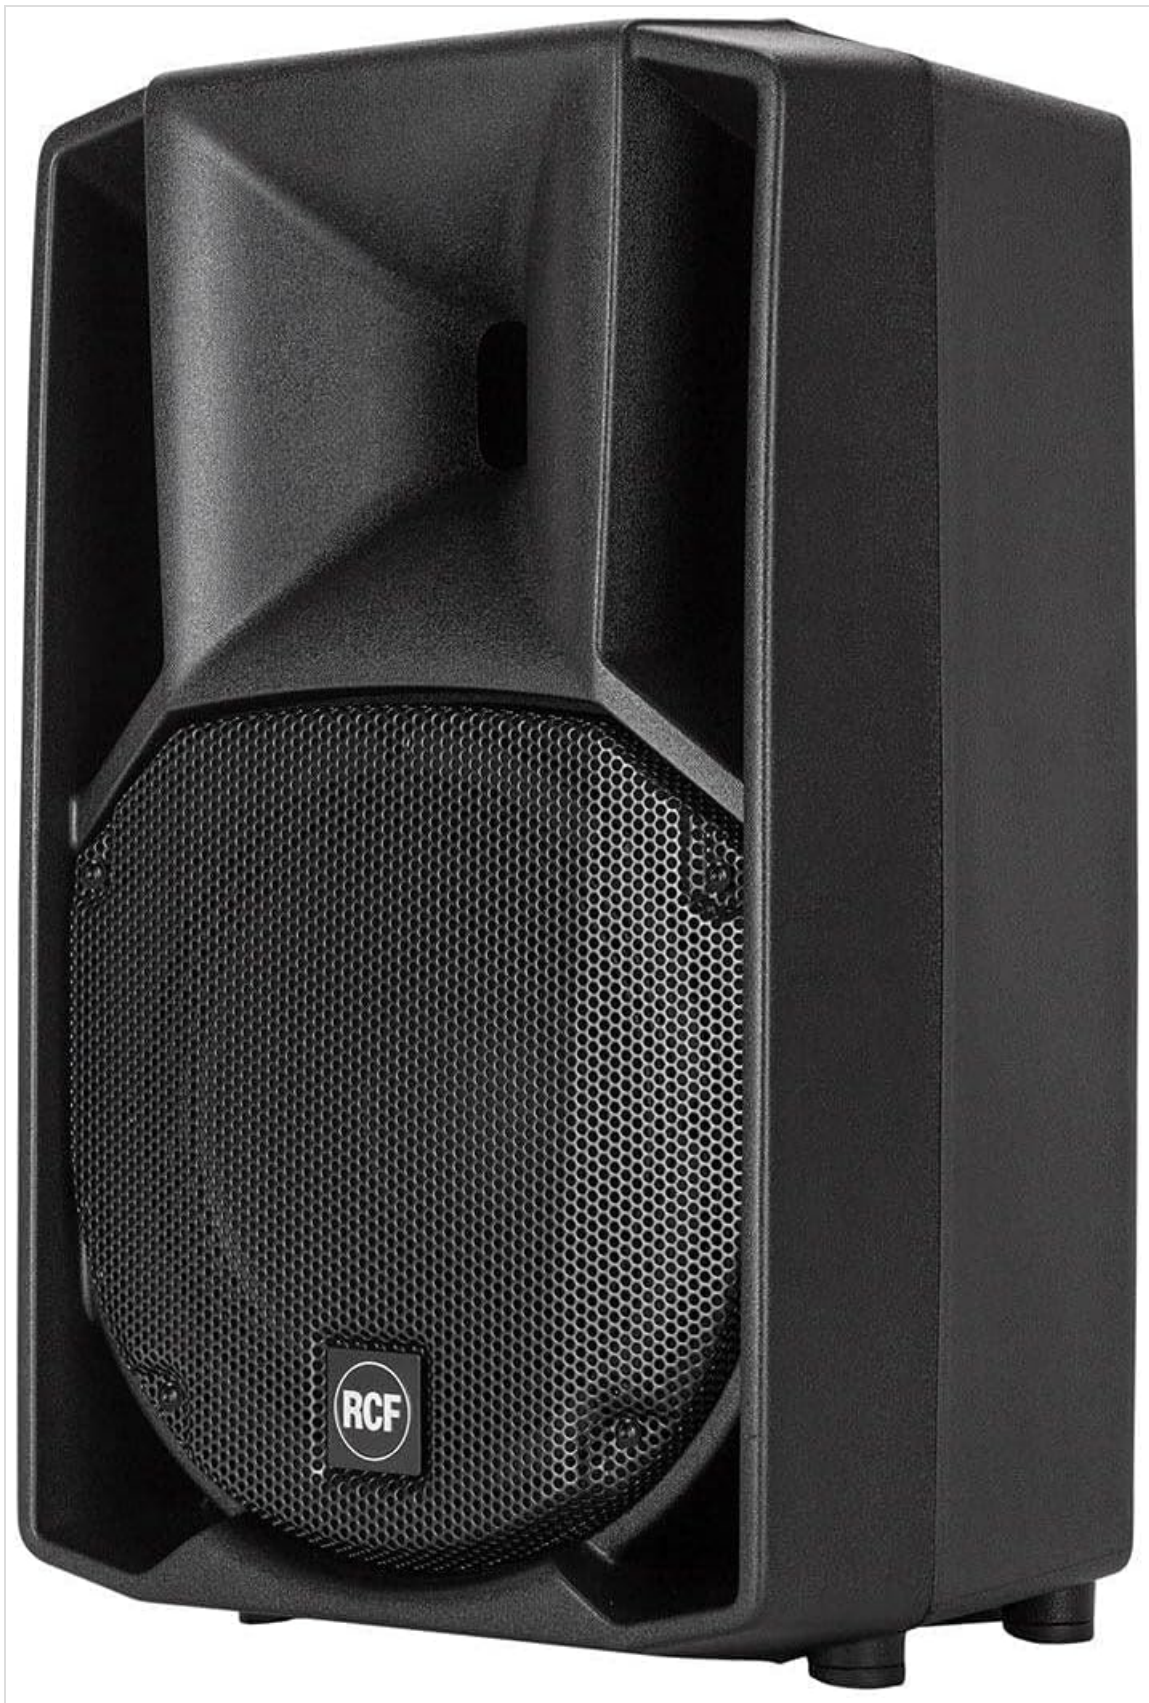

Figure 1: Front view of the RCF ART 710A active speaker, showcasing its robust grille and RCF logo.

IMPORTANT SAFETY INFORMATION

- **Power Supply:** Ensure the power supply voltage matches the requirements specified on the unit. Use only the provided power cord.
- **Ventilation:** Do not block ventilation openings. Ensure adequate airflow around the unit to prevent overheating.

- **Moisture:** Do not expose the unit to rain or moisture. Avoid placing liquids on or near the speaker.
- **Placement:** Place the speaker on a stable, level surface or mount it securely using appropriate hardware.
- **Servicing:** Refer all servicing to qualified service personnel. Do not attempt to open or repair the unit yourself.
- **Hearing Protection:** Prolonged exposure to high sound pressure levels can cause permanent hearing damage. Use hearing protection when operating at high volumes.

KEY FEATURES

- 1400W Peak Power, 700W RMS
- 10-inch Woofer, 1-inch Compression Driver
- FiRPHASE Technology for linear response
- Integrated DSP with equalization, phase control, soft limiting, crossover, and speaker protections
- Class D Amplifiers
- Frequency Response: 50 Hz - 20 kHz
- Maximum SPL: 129 dB

SETUP

1. Unpacking

Carefully remove the speaker from its packaging. Inspect the unit for any signs of damage that may have occurred during transit. Retain the original packaging for future transport or storage.

2. Placement and Mounting

The ART 710A can be used as a main front-of-house speaker, a stage monitor, or mounted on a pole. Ensure the speaker is placed on a stable surface or securely mounted.

- **Pole Mounting:** Use a standard 35mm speaker pole. Ensure the pole is rated to support the speaker's weight (approximately 37 lbs / 16.8 kg).
- **Floor Placement:** For stage monitor applications, position the speaker at the desired angle.
- **Suspension:** If suspending the speaker, consult a qualified professional and use appropriate rigging hardware.

Figure 2: Top view of the RCF ART 710A, highlighting the integrated pole mount socket for stand placement.

3. Connections

Refer to the rear panel for all input and output connections.

Figure 3: Rear panel of the RCF ART 710A, displaying XLR inputs, output, volume control, and power connection.

1. **Audio Input:** Connect your audio source (mixer, instrument, etc.) to the **BALANCED INPUT** using an XLR cable.
2. **Audio Output (Link):** Use the **BALANCED OUTPUT** to link to another speaker or audio device.
3. **Power Input:** Connect the provided power cord to the **AC INPUT** socket.
4. **Input Sensitivity Switch:** Adjust for microphone or line-level signals.
5. **Volume Control:** Adjust the overall output level of the speaker.

1. Powering On/Off

- Ensure all connections are secure and the volume control is set to minimum before powering on.
- Flip the **POWER SWITCH** to the "ON" position. The power indicator LED will illuminate.
- To power off, set the volume to minimum, then flip the **POWER SWITCH** to "OFF".

2. Adjusting Volume and Input Sensitivity

- Start with the **VOLUME** control at its minimum setting.
- Set the **INPUT SENSITIVITY** switch according to your source: "MIC" for microphone level signals, "LINE" for line level signals (e.g., mixer output).
- Gradually increase the **VOLUME** control to the desired listening level. Monitor the signal LEDs to avoid clipping (distortion).

3. DSP Functions (Internal Processing)

The ART 710A features an integrated Digital Signal Processor (DSP) that manages equalization, phase control, soft limiting, crossover, and speaker protections automatically. There are no user-adjustable DSP parameters directly on the unit. The system is optimized for a linear response and balanced sound.

MAINTENANCE

- **Cleaning:** Clean the speaker cabinet with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Grille:** Periodically check the front grille for dust or debris and gently clean if necessary to maintain optimal sound dispersion.
- **Storage:** When not in use for extended periods, store the speaker in a dry, temperate environment, ideally in its original packaging or a protective cover.
- **Inspection:** Regularly inspect power cables and audio cables for any signs of wear or damage. Replace damaged cables immediately.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No sound output	No power	Check power cable and switch
	Volume too low	Increase volume control
	Incorrect input connection	Verify input cable is connected to BALANCED INPUT
	Faulty audio cable	Test with a different audio cable
Distorted sound	Input signal too high (clipping)	Reduce input signal level from source
	Volume too high	Decrease speaker volume
	Incorrect input sensitivity	Ensure INPUT SENSITIVITY is set correctly (MIC/LINE)

Problem	Possible Cause	Solution
Hum or noise	Ground loop	Use balanced cables
	Unshielded cables	Ensure all equipment is on the same electrical circuit or use a ground lift (if safe)
	Interference from other electronics	Move speaker or cables away from power sources or other electronics

TECHNICAL SPECIFICATIONS

Feature	Detail
Model	RCF ART 710A
Speaker Type	Active 2-way Speaker
Power Output	1400W Peak, 700W RMS
Woofers	10-inch
Compression Driver	1-inch
Frequency Response	50 Hz - 20 kHz
Max SPL	129 dB
DSP Features	FiRPHASE Technology, EQ, Phase Control, Soft Limiting, Crossover, Protections
Amplifier Type	Class D
Input Connectors	XLR
Output Connectors	XLR
Dimensions (H x W x D)	22.3 x 15.4 x 13.9 inches (56.6 x 39.1 x 35.3 cm)
Weight	37 lbs (16.8 kg)
Power Source	Corded Electric

WARRANTY INFORMATION

RCF products are covered by a limited warranty against defects in materials and workmanship. The specific terms and duration of the warranty may vary by region and product. Please refer to the official RCF website or your local distributor for detailed warranty information and registration procedures. Keep your proof of purchase for warranty claims.

CUSTOMER SUPPORT

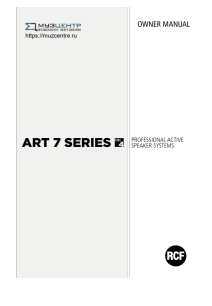

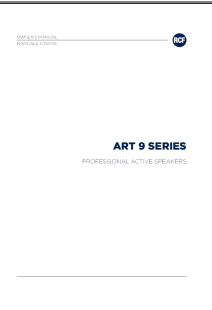

For technical assistance, service, or spare parts, please contact RCF customer support or your authorized RCF dealer. You can find contact information on the official RCF website:

[RCF Official Support Website](#)

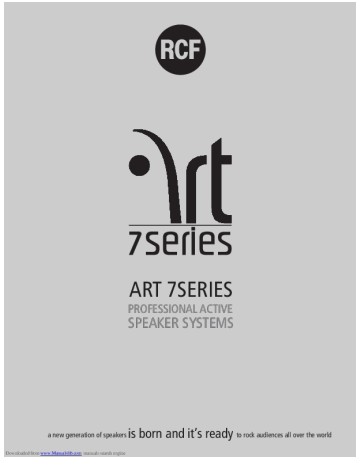

When contacting support, please have your product model (ART 710A) and serial number ready. The serial number is located on the rear panel of the speaker.

DATASHEET

ART 710-A MK5
ACTIVE TWO-WAY SPEAKER

DESCRIPTION

ART 710-A MK5 is a unique product in its category. The 1.75" compression driver offers unique vocal clarity and sound projection. The 10" woofer offers an extremely linear response and a precise, deep low frequency control. The transducers are produced using the most advanced assembly technologies. The amplifier delivers 1400 watts and is controlled by a DSP that takes care of crossover, equalization, phase control, soft limiting and speaker protection.

FEATURES

- 120 dB Max SPL
- 1400 WATT 2-way peak power
- 90° x 70° Wide dispersion constant directivity horn
- Innovative DSP Processing
- 1.75" Compression Driver
- 10" Woofer
- FIR/PALE Technology
- 48000T Low Frequency Enhancer
