## COSMO COS-5MU30

# COSMO COS-5MU30 Under Cabinet Range Hood Instruction Manual

Model: COS-5MU30 | Brand: COSMO

## INTRODUCTION

The COSMO COS-5MU30 under cabinet range hood from the Delta Collection is designed to enhance any kitchen with its modern styling and efficient performance. Crafted from brushed stainless steel, this unit effectively removes cooking odors and smoke. It features easy-to-use push button controls, durable reusable filters, and integrated LED lighting for optimal visibility.

## PRODUCT FEATURES

- **Slim Space-Saving Design:** Part of the Delta Collection, its slim profile is ideal for condos and apartments.
- **Convertible Ventilation:** Can be installed as ducted (top or back venting) or ductless with the optional Carbon Filter Kit # CFK4 (sold separately).
- **Efficient & Quiet Operation:** Features a 3-speed motor with a noise level as low as 50 dB on the lowest fan speed (with rigid ducting under optimal conditions).
- **User-Friendly Controls:** Equipped with push button controls to manage fan speed, lights, and power.
- **Superior Multi-Layer Filtration:** Includes durable, reusable aluminum mesh filters to effectively trap grease and oil.
- **Integrated LED Lighting:** Built-in LED lights ensure clear visibility of your cooking surface.

## INSTALLATION

The COS-5MU30 range hood is designed for under cabinet mounting and offers both ducted and ductless installation options. For ducted installation, a 5-inch round duct is required, and HVAC tape is

recommended for secure connections. For ductless (recirculating) operation, the optional Carbon Filter Kit # CFK4 must be purchased separately.

## Ductless Conversion

To convert the range hood to ductless operation, follow these steps:

1. Open the unit by removing the mesh filters.
2. Locate the switch in the middle of the fan unit and remove the bolt with a Phillips tool.
3. Change the switch to the ductless position, which allows exhaust to flow out of the front vent. Replace the bolt.
4. Install the Carbon Filter Kit # CFK4 (sold separately) by placing the charcoal filter on top of the middle piece and tightening it into place.
5. Replace the mesh filters. Your range hood is now set for ductless operation.

## Switching the Range Hood to Ductless

- 1.** Open the unit by removing the mesh filters and locate the switch in the middle of the fan unit. Remove the bolt with a Phillips tool.

- 2.** Change the switch to the ductless position which allows the exhaust to flow out of the front vent. Replace bolt with Phillips tool.

- 3.** You will need **Part # CFK4** Carbon Filter Kit (sold separately). Place the charcoal filter on top of the middle piece and tighten it into place. Replace mesh filters and your range hood is now ductless.

## MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your range hood.

### Cleaning the Mesh Filters

The multi-layer aluminum mesh filters are reusable and designed to trap grease and oil effectively. They should be cleaned regularly depending on cooking frequency.

- To remove, locate the small handle or latch on each filter and gently pull down.
- Wash the filters with warm, soapy water or place them in a dishwasher.
- Ensure filters are completely dry before re-installing.
- To re-install, align the filter with the slots and push up until it clicks into place.
