MAINTENANCE

To maintain the condition and functionality of your Zinus SmartBase Compack bed frame, follow these simple maintenance guidelines:

- **Regular Cleaning:** Wipe down the metal frame with a damp cloth to remove dust and debris. Avoid harsh chemicals that may damage the finish.
- **Check Connections:** Periodically inspect all bolts and connections to ensure they remain tight. Re-tighten if necessary to prevent squeaking or instability.
- **Floor Protection:** The frame includes plastic caps on the legs to protect your flooring. Ensure these caps remain in place.

TROUBLESHOOTING

If you encounter any issues with your Zinus SmartBase Compack bed frame, refer to the following common solutions:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all bolts on the frame. Ensure the frame is on a level surface.
- **Mattress Sliding:** If your mattress tends to slide on the frame, some models include double-sided adhesive tape on the slats to help secure it. Alternatively, placing a non-slip mat or a thin piece of cardboard between the mattress and the slats can prevent movement.
- **Instability:** Ensure all frame sections are correctly assembled and all bolts are fully tightened. Verify that the frame is placed on a flat, even floor.
