Brightech Maxwell LED Floor Lamp - Drawer

Brightech Maxwell Drawer Edition Floor Lamp User Manual

Model: Maxwell LED Floor Lamp - Drawer

1. PRODUCT OVERVIEW

The Brightech Maxwell Drawer Edition is a versatile floor lamp designed to provide both illumination and practical storage solutions. It features a modern, Asian-inspired design with a soft ambient glow, making it suitable for various decor styles including mid-century modern, farmhouse, and contemporary settings.

This multi-functional unit includes a lamp, four tiered display shelves, and discreet drawers for convenient storage. It is ideal for use in bedrooms, living rooms, guest rooms, foyers, or offices, helping to create an uncluttered and organized living space.

The lamp is equipped with a long-lasting, energy-saving LED bulb and offers smart home compatibility (requires a smart outlet and/or bulb, sold separately) for integration with systems like Alexa, Google Home Assistant, and Apple Home Kit.

2. SETUP AND ASSEMBLY

The Brightech Maxwell Drawer Edition Floor Lamp is designed for straightforward assembly. Most users report completing assembly within 30 minutes to an hour, requiring only a Phillips head screwdriver for a few screws, with other components screwing in by hand.

2.1. Unpacking and Component Identification

Carefully unpack all components from the box. It is recommended to lay out all parts to ensure nothing is missing and to familiarize yourself with each piece before beginning assembly. The lamp typically comes with approximately 76 pieces, including extra screws.

Figure 2: All components of the lamp laid out, including the frame pieces, shelves, drawers, and hardware.

2.2. Assembly Steps

1. Begin by assembling the base and the lowest shelf, ensuring all connections are secure.
2. Continue adding the vertical support poles and subsequent shelves layer by layer. The design allows for customization of height by omitting pole sections if a shorter lamp is desired.
3. Insert the drawers into their designated slots.
4. Install the light bulb into the socket located beneath the top shade.
5. Secure the lamp shade to the top frame.
6. Utilize the included cable clamps to neatly route and secure the power cord along the back of the lamp's frame, minimizing visibility.

2.3. Placement Considerations

The Maxwell lamp has a narrow footprint, making it suitable for tight spaces. Consider its dimensions (1.18"D x 1.97"W x 72"H) when planning placement. Ensure it is placed on a stable, level surface. While sturdy, it is a tall, slender unit, and caution should be exercised to prevent tipping, especially on uneven surfaces like thick carpet.

3. OPERATING INSTRUCTIONS

3.1. Light Operation

The lamp is operated via a pull chain switch located beneath the top shade. Pull the chain once to turn the light on, and pull it again to turn it off.

3.2. Drawer and Shelf Usage

The integrated drawers provide discreet storage for small items. The shelves are designed for displaying decorative items, books, or plants. Please adhere to the following weight limits:

- **Shelves:** Maximum 6 pounds per shelf.
- **Drawers:** Maximum 1 pound per drawer.

Figure 4: A close-up view demonstrating the functionality of the integrated drawers.

3.3. Smart Home Compatibility

The Brightech Maxwell Drawer Edition is compatible with smart home systems such as Alexa, Google Home Assistant, and Apple Home Kit for on/off functionality. To enable this feature, a compatible smart outlet and/or smart bulb (sold separately) is required.

4. MAINTENANCE

4.1. Cleaning

To clean the lamp, wipe surfaces with a soft, dry cloth. Avoid using abrasive cleaners or solvents that may damage the finish. For the fabric shade, a lint roller or a soft brush can be used to remove dust.

4.2. Bulb Replacement

The lamp includes a 9.5 Watt, 800 lumen LED light bulb with an estimated lifespan of 20,000 hours (approximately 20 years of typical use). When replacement is eventually needed, ensure the lamp is unplugged before changing the bulb. Use an A19 shape LED bulb with a maximum wattage equivalent to 60W CFL.

5. TROUBLESHOOTING

5.1. Light Not Turning On

- Check if the power cord is securely plugged into a working electrical outlet.
- Ensure the pull chain switch is fully engaged.
- Verify that the light bulb is properly screwed into the socket and is not burnt out. Replace if necessary.

5.2. Instability

- Ensure the lamp is placed on a flat, stable surface.
- Check all assembly connections to ensure they are tightened securely.
- Verify that the weight on the shelves and in the drawers does not exceed the recommended limits (6 lbs per shelf, 1 lb per drawer).

6. SPECIFICATIONS

Feature	Detail
