## MAINTENANCE AND CARE

---

Proper care will extend the life of your bra and maintain its shape and elasticity.

- **Washing:** Hand wash only. Use mild detergent and lukewarm water. Gently squeeze out excess water.
- **Drying:** Lay flat to dry or hang to air dry. Do not tumble dry, as high heat can damage the fabric and elasticity.

- **Bleaching:** Do not bleach.
- **Ironing:** Do not iron.
- **Dry Cleaning:** Do not dry clean.

## TROUBLESHOOTING

---

- **Issue: Bra feels too tight or too loose.**

**Solution:** Ensure you have selected the correct size based on the provided size chart. Adjust the shoulder straps for a more comfortable fit. If the issue persists, consider trying a different size.

- **Issue: Straps slip off shoulders.**

**Solution:** Tighten the adjustable straps. If straps are tightened but still slip, your bra size might be incorrect, or the strap adjusters may need to be checked for wear.

- **Issue: Fabric loses elasticity or shape.**

**Solution:** Ensure you are following the "Hand Wash Only" and air-drying instructions. Machine washing or tumble drying can damage the fabric's elasticity and shape over time.
