Maintenance

The ZINUS Platforma Bed Frame is constructed from strong and durable steel, designed for long-lasting use. To maintain its appearance and structural integrity, periodically check all connections and tighten screws as needed. For general care of your bedding and mattress, follow their specific care instructions. The manufacturer's care instructions for the product itself are 'Dry Clean Only', which typically applies to fabric components or bedding, not the metal frame.

Troubleshooting

While the ZINUS Platforma Bed Frame is designed for stability and minimal noise, here are some common points to consider if you encounter issues:

- **Squeaking or Instability:** Ensure all bolts and screws are fully tightened. Over time, connections may loosen slightly, requiring re-tightening.
- **Mattress Sliding:** The wooden slats include non-slip adhesive strips. Ensure these strips are properly utilized and free from debris to maintain mattress stability.
- **Floor Protection:** If placing the bed frame on hardwood floors, consider using floor protectors under the legs to prevent scratches and provide additional stability.
