3. Setup and Assembly

The Schleich Horse Club Lisa's Tournament Training Horse Set requires minimal assembly. The main components are pre-assembled figures and accessories.

1. **Paddock Assembly:** Connect the four paddock fence sections by aligning the pegs and holes. These can be arranged in various configurations to create an enclosure for the horses.
2. **Obstacle Setup:** The obstacle jump consists of a base and three removable bars. Place the bars onto the designated slots on the obstacle frame. The height of the bars can be adjusted by placing them on different levels.
3. **Accessory Placement:** Position the hay rack and apples within the paddock or training area as desired. The trophy can be placed near the obstacle to signify a competition.

4. Operating Instructions (Play Scenarios)

This playset is designed for open-ended imaginative play. Here are some suggested play scenarios:

- **Training Session:** Use the Appaloosa mare, gelding, and foal to practice jumping over the obstacle. Adjust the obstacle height for different training levels.
- **Horse Show:** Set up the paddock as a show ring. Have the horses perform their best jumps to win the golden trophy.
- **Feeding Time:** Place the apples in the hay rack for the horses to "eat" after their training.

5. Maintenance and Care

To ensure the longevity of your Schleich Horse Club playset, follow these care instructions:

- **Cleaning:** Wipe figures and accessories with a damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** Store the playset in a cool, dry place away from direct sunlight to prevent fading or material degradation.
- **Handling:** While durable, avoid excessive force or bending of the figures to prevent damage.

6. Troubleshooting

This product is a simple toy set and typically does not require troubleshooting. If any parts appear damaged or defective upon arrival, please contact customer support.

- **Loose Parts:** Ensure all small parts are securely attached during play.
- **Assembly Difficulty:** If fence sections or obstacle bars are difficult to connect, ensure they are aligned correctly. Do not force parts together.
