GETTING STARTED

Preparing Your Hatchimals ColLEGGtibles

Before you begin the hatching process, ensure you have a clean, flat surface. Remove the ColLEGGtibles eggs and the crystal nest from their packaging. The crystal nest can be used to display your hatched ColLEGGtibles.

HATCHING YOUR COLLEGGTIBLES

Step-by-Step Hatching Guide

Each Hatchimals ColLEGGtible egg has a heart on its shell. This heart changes color when it's ready to hatch!

- Warm the Heart:** Hold the egg in your hands and gently rub the purple heart on the shell. As you rub, the heat from your hands will cause the heart to change color.
- Observe Color Change:** Continue rubbing until the heart changes from purple to pink. This indicates that your ColLEGGtible is ready to hatch.
- Gently Crack the Shell:** Once the heart is pink, gently press on the shell just above the heart to crack it. Continue to peel away pieces of the shell to reveal your new ColLEGGtible.
- Reveal Your Character:** Carefully remove your ColLEGGtible from the egg. You can keep the bottom half of the eggshell to use as a small bed or display stand for your character.
- Identify Your ColLEGGtible:** Each ColLEGGtible has unique features. Refer to the collector's guide (not included in this specific pack but available online) to identify your character and its rarity.

Note: The hatching process is designed to be a gentle and interactive experience. Do not force the egg open before the heart changes color.

CARE AND MAINTENANCE

- Cleaning:** To clean your ColLEGGtibles, gently wipe them with a damp cloth. Do not submerge them in water.
- Storage:** Store your ColLEGGtibles and their nest in a clean, dry place away from direct sunlight and extreme temperatures.
- Handling:** Handle your ColLEGGtibles with care to prevent damage to their delicate features.
- Display:** Use the included crystal nest to proudly display your hatched Owlicorn ColLEGGtibles.

TROUBLESHOOTING

Issue	Solution
Heart not changing color.	Ensure your hands are warm and you are rubbing the heart consistently. It may take a few moments for the heat to transfer.
Difficulty cracking the shell.	Apply gentle, consistent pressure to the area just above the heart once it has turned pink. The shell is designed to crack easily at this point. Do not use excessive force.
ColLEGGtible appears stuck inside.	Carefully peel away more of the shell. If necessary, gently wiggle the ColLEGGtible to free it.
