## Technical Precision VIZI BEAM 5RX

# Technical Precision Replacement Lamp for ADJ Vizi Beam 5RX User Manual

## INTRODUCTION

---

This user manual provides essential information for the safe and effective installation, operation, and maintenance of your Technical Precision Replacement Lamp for the ADJ Vizi Beam 5RX lighting fixture. This product is designed to restore optimal light output and performance to your compatible stage lighting equipment. Please read this manual thoroughly before attempting any installation or operation.

## PRODUCT OVERVIEW

---

*Image: Replacement lamp for ADJ Vizi Beam 5RX*

This image displays the replacement lamp, a crucial component designed for the ADJ Vizi Beam 5RX lighting fixture. It features a clear glass bulb with an internal filament, mounted on a ceramic base with electrical contacts, ready for installation. The design ensures precise fitment and electrical connection within the compatible lighting unit.

## IMPORTANT SAFETY INFORMATION

---

Always adhere to the following safety precautions to prevent injury or damage to the product and equipment:

- **Disconnect Power:** Always ensure the lighting fixture is completely disconnected from the power source before attempting any installation, removal, or maintenance.
- **Allow Cooling:** Lamps operate at high temperatures. Allow the fixture and the old lamp to cool down completely (at least 30 minutes) before handling.
- **Handle with Care:** Lamps are fragile. Avoid dropping or subjecting them to impact.
- **Avoid Touching Glass:** Do not touch the glass part of the new lamp with bare hands. Oils from your skin can create hot spots, leading to premature lamp failure. Use a clean, lint-free cloth or gloves.
- **Proper Disposal:** Dispose of old lamps according to local regulations, as they may contain hazardous materials.
- **Ventilation:** Ensure the lighting fixture has adequate ventilation as specified by its manufacturer to prevent overheating.

## SETUP AND INSTALLATION

---

Follow these steps carefully to replace the lamp in your ADJ Vizi Beam 5RX fixture:

1. **Power Off and Disconnect:** Turn off the lighting fixture and unplug it from the main power supply.
2. **Allow to Cool:** Wait for the fixture and the old lamp to cool down completely. This may take 30 minutes or more.
3. **Access Lamp Compartment:** Refer to your ADJ Vizi Beam 5RX user manual for instructions on how to safely open the lamp compartment. This usually involves removing screws or latches.
4. **Remove Old Lamp:** Carefully unclip or unscrew the old lamp from its socket. Handle it by its base, avoiding the glass.
5. **Install New Lamp:** Wearing clean gloves or using a lint-free cloth, carefully insert the new Technical Precision replacement lamp into the socket. Ensure it is seated firmly and correctly according to the fixture's design. Do not force it.
6. **Secure Lamp:** Re-secure the lamp with any clips or screws that were removed.
7. **Close Compartment:** Close and secure the lamp compartment cover. Ensure all screws or latches are properly fastened.
8. **Power On:** Reconnect the fixture to the power supply and turn it on. The new lamp should illuminate.

## OPERATING INSTRUCTIONS

---

Once the replacement lamp is installed, the operation of your ADJ Vizi Beam 5RX fixture will resume as normal, controlled by the fixture's internal systems and external DMX controller (if applicable). For optimal lamp life and performance, observe the following:

- **Warm-up Period:** Allow the lamp to warm up fully after initial power-on before subjecting it to full intensity or rapid movements.
- **Cool-down Period:** Avoid immediately powering off the fixture after extended use. Allow it to run for a few minutes in a low-power or standby mode to cool down the lamp before shutting off completely. This helps prevent thermal shock and extends lamp life.
- **Avoid Frequent On/Off Cycles:** Repeatedly turning the lamp on and off can significantly reduce its lifespan.

## MAINTENANCE

Proper maintenance can extend the life of your replacement lamp and ensure consistent performance:

- **Regular Cleaning:** Periodically clean the exterior of the lighting fixture and any accessible optical components (lenses, reflectors) with a soft, lint-free cloth. Ensure the fixture is off and cool before cleaning.
- **Ventilation Check:** Ensure that the fixture's ventilation openings are clear of dust and debris to allow for proper airflow and heat dissipation.
- **Lamp Handling:** When handling the lamp during installation or removal, always use gloves or a clean cloth to avoid transferring skin oils to the glass.
- **Storage:** If storing a spare lamp, keep it in its original packaging in a cool, dry place away from direct sunlight and extreme temperatures.

## TROUBLESHOOTING

If you encounter issues after installing the replacement lamp, consider the following common problems and solutions:

Problem	Possible Cause	Solution
Lamp does not light up	No power to fixture; Lamp not seated correctly; Faulty lamp; Fixture issue	Check power connection; Re-seat lamp; Test with another known good lamp (if available); Consult fixture manual
Lamp is dim or flickers	Lamp nearing end of life; Poor connection; Fixture issue	Replace lamp if old; Check lamp seating; Consult fixture manual
Lamp blows shortly after installation	Improper handling (fingerprints); Overheating (poor ventilation); Voltage fluctuation; Fixture issue	Ensure clean handling; Check fixture ventilation; Use surge protector; Consult fixture manual

## SPECIFICATIONS

The following specifications apply to the Technical Precision Replacement Lamp for ADJ Vizi Beam 5RX:

Attribute	Value
Brand	Technical Precision
Part Number	VIZI BEAM 5RX
Wattage	1 watts
Voltage	120 Volts
Brightness	450 Lumen
Unit Count	1.0 Count

Attribute	Value
Number of Items	1
Shape	Arbitrary(A)
Connectivity Technology	Normal bulb
Controller Type	Push Button
Control Method	App
Item Package Quantity	1
Batteries Included?	No
Batteries Required?	No
Manufacturer	Technical Precision
