Bissell 1134N

BISSELL Oxygen Boost Formula 1134N User Manual

For use with BISSELL SpotClean and SpotClean Pro Carpet Cleaners

1. PRODUCT OVERVIEW

The BISSELL Oxygen Boost Formula 1134N is a powerful cleaning solution designed to enhance the stain removal capabilities of your BISSELL SpotClean, SpotClean Pro, and Stain Eraser devices. This formula penetrates deep into carpet fibers to effectively eliminate tough marks and revitalize the appearance of your carpets and upholstery.

It is formulated to permanently remove old, ingrained stains, providing a thorough clean. The bottle itself is made with at least 25% post-consumer recycled plastic, reflecting a commitment to environmental responsibility.

Important: This formula is not suitable for use on velvet, chenille, silk, Dralon, or leather materials.

2. SETUP AND PREPARATION

1. **Read Your Machine Manual:** Always refer to your BISSELL SpotClean, SpotClean Pro, or Stain Eraser machine's user manual for specific instructions on filling the clean water tank and mixing solutions.
2. **Mixing the Solution:** Add the BISSELL Oxygen Boost Formula to your machine's clean water tank along with your primary BISSELL cleaning solution. Follow the dilution ratios specified in your machine's manual.
3. **Pre-Test:** Before cleaning, always test the formula on an inconspicuous area of the carpet or upholstery for colorfastness. Allow the tested area to dry completely and check for any color change or bleeding.
4. **Direct Application (for tough stains):** For particularly stubborn stains, the Oxygen Boost Formula can be applied directly to the stain before using your machine. Allow it to sit for a few minutes, then proceed with machine cleaning.

3. OPERATING INSTRUCTIONS

1. **Prepare the Area:** Vacuum the area to be cleaned to remove loose dirt and debris.
2. **Apply Solution:** Using your BISSELL SpotClean or SpotClean Pro machine, spray the cleaning solution (mixed with Oxygen Boost) onto the stained area. Ensure the area is adequately saturated.
3. **Scrub (if applicable):** If your machine has a brush attachment, gently scrub the stained area to work the solution into the fibers.
4. **Extract:** Use your machine's suction feature to extract the dirty solution from the carpet or upholstery. Make slow, overlapping passes until the solution being extracted appears clean.
5. **Repeat if Necessary:** For very tough or old stains, you may need to repeat the application and extraction process.
6. **Drying:** Allow the cleaned area to dry thoroughly. Avoid walking on or placing furniture on damp carpets.

4. MAINTENANCE AND STORAGE

- **Storage:** Store the BISSELL Oxygen Boost Formula in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Cap Securely:** Always ensure the bottle cap is tightly sealed after each use to prevent evaporation or spills.
- **Keep Out of Reach:** Keep the product out of reach of children and pets.
- **Disposal:** Dispose of empty bottles according to local regulations. The bottle is made with at least 25% post-consumer recycled plastic.

5. TROUBLESHOOTING

- **Stains Persist:** If stains remain after initial cleaning, re-apply the solution and allow it to penetrate for a longer period (e.g., 5-10 minutes) before extracting. Ensure you are using the correct dilution ratio.
- **Material Damage:** If you notice any discoloration or damage to the cleaned surface, immediately stop use. Remember, the formula is not suitable for velvet, chenille, silk, Dralon, or leather. Always pre-test.
- **Foaming:** Excessive foaming in the dirty water tank may indicate too much cleaning solution was used. Reduce the amount of formula in subsequent uses.
- **No Suction:** If your machine is not extracting properly, check your machine's manual for troubleshooting steps related to suction issues (e.g., tank levels, hose blockages).

6. SPECIFICATIONS

Feature	Detail
Model Number	1134N
Brand	Bissell
Item Form	Liquid
Item Volume	1 Litre (1000 Millilitres)
Product Dimensions (L x W x H)	7 x 12 x 23.8 cm
Item Weight	1.1 Kilograms
Scent	Coffee (Note: This may be a translation error from the source data, typically cleaning solutions are unscented or have a fresh scent)
Specific Product Uses	Carpet, Upholstery (excluding unsuitable materials)
Material Feature	Scented (refer to scent note above)
Special Feature	Concentrated
Surface Recommendation	Carpet
Material Not Used	Acid-free
Contains Liquid Substances	Yes
Ingredients	≥ 95% water, ≥ 5% hydrogen peroxide
