## OPERATING INSTRUCTIONS

The PK Power AC DC Adapter operates automatically once connected. It provides continuous power to your compatible Bushnell camera, eliminating the need for battery power when an AC outlet is available.

- **Continuous Power:** The adapter supplies constant power, ideal for extended surveillance or monitoring.
  - **Battery Bypass:** When connected, the camera typically draws power directly from the adapter, preserving internal batteries (if installed).
  - **Disconnection:** To disconnect, first power off your camera (if applicable), then unplug the adapter from the wall outlet, and finally disconnect the barrel connector from the camera.
- 

## MAINTENANCE

---

Proper care ensures the longevity and reliable performance of your adapter:

- **Cleaning:** Disconnect the adapter from all power sources before cleaning. Use a soft, dry cloth to wipe the exterior. Do not use liquid cleaners or solvents.
  - **Storage:** When not in use, store the adapter in a cool, dry place, away from direct sunlight and extreme temperatures. Coil the cable loosely to prevent damage.
  - **Inspection:** Periodically inspect the adapter and cable for any signs of wear, cuts, or damage. If damage is found, discontinue use.
